CLINICAL PATHWAYS

A clinical pathway is a care plan that outlines the essential steps in the care of patients with a specific clinical problem and describes the patients' expected clinical course. Interdisciplinary teams at CHOP have developed many clinical pathways, and we are proud to offer them as a resource for clinicians at other institutions.

Clinical pathways help standardize care, improve outcomes and reduce costs. Visit [chop.edu/pathways](https://www.chop.edu/pathways) for free access to more than 120 pathways on topics including:

- Asthma
- Blood Culture Acquisition in PICU/PCU Patient with Fever
- Community-Acquired Pneumonia
- Febrile Urinary Tract Infection
- Febrile Young Infants
- Influenza
- Neonatal Abstinence Syndrome
- Sedation/Analgesia in the Mechanically Ventilated Patient
- Steroid Stress Dosing and Weaning
- Suspected Severe Sepsis
