

EUCERIN ECZEMA RELIEF CREAM IS A DAILY ECZEMA MAINTENANCE SOLUTION PROVEN TO PREVENT FLARES

Daily use of Eucerin® Eczema Relief Cream reduces the incidence of flares and increases the time-to-flare recurrence

% OF CHILDREN WHO REMAINED FLARE-FREE FOR 6 MONTHS

Study design: 180-day assessment of children aged 3 months to 12 years with atopic dermatitis, after a 2-week wash-out period, who applied Eucerin Eczema Relief Cream daily in addition to cleanser (n=19) vs a control group using only a cleanser (n=23).

†Statistically significant difference between treatments (p<0.05).

STUDY RESULTS

- Prolonged median time-to-flare recurrence for Eucerin was greater than 180 days vs 28 days for the control group
- Reduced risk of flare by **44%** in pediatric subjects with daily moisturization
