## LESS CRYING

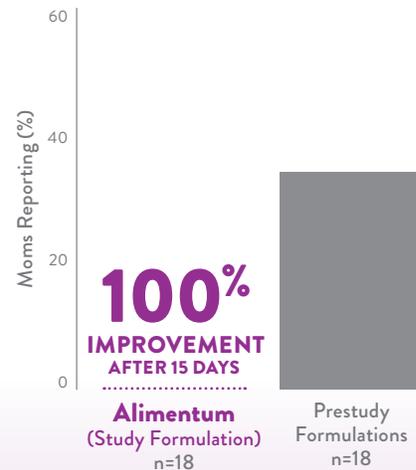

In a tolerance study, after feeding Similac Alimentum for 15 days, there was a **39% decrease in moms who reported that their baby cried or fussed** before or during bowel movements.<sup>1,†</sup>

† Results based on parental observation in a nonrandomized, single-group study of a small number of subjects.

## SOFTER STOOLS

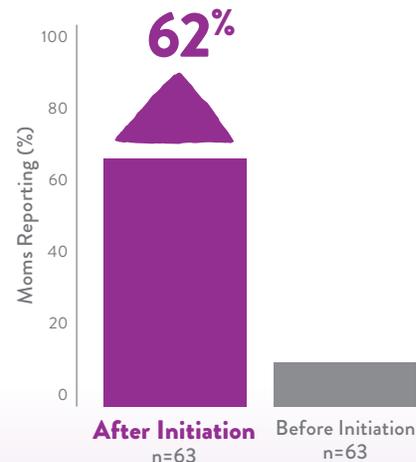

In the same study, after 15 days of feeding Alimentum, **no moms reported that their baby's stools were too hard.**<sup>1</sup>

## BETTER SLEEP

After initiation of Alimentum, **62% of parents reported good to excellent quality of infant sleep** vs 10% before initiation.<sup>‡</sup>
