

VFC Compliance Simplified

- ✓ Manages the separation of VFC and private inventory automatically
- ✓ Automates 7 of the 10 required activities in the VFC Operations Guide
- ✓ Approved for VFC use across the country

“Numerous vaccine storage units have entered the market that are designed specifically for the storage of vaccines. They can take the form of dispensing or vending units, either with or without doors... they are unique in that they are designed and tested to keep vaccines in appropriate storage conditions.”

– CDC Vaccine Storage and Handling Toolkit, January 2019

Automates VFC activities

VFC providers must perform required activities in 10 categories established in the Vaccine Management Module of CDC's VFC Operations Guide

AccuVax automates 7 of 10 VFC activities
