ManagedHPC®

MANAGE

By implementing industry standard best practices and taking care of all your day-to day issues promptly, you don't have to worry about optimal cluster management.

MONITOR

We proactively monitor your cluster to identify and resolve issues in a timely manner thus maximizing uptime.

REPORT

Quarterly performance reports and recommendations help you identify trends and do better planning for the future.
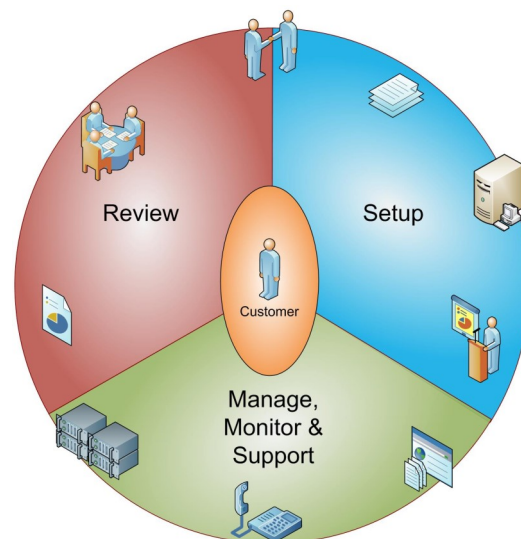

WORRY FREE OUTSOURCED CLUSTER MANAGEMENT

ManagedHPC is a complete remote cluster management service that addresses the need for expert HPC systems administration, allowing customers to focus on their core engineering and research.

Are your engineers spending time working on your HPC cloud or cluster vs. their core strengths?

Is your HPC solution fully optimized?

Are you looking to control costs and mitigate IT risk?

"To me, the mark of a good service is that things aren't crises, systems are managed and the operation goes smoothly."

- Paul Westhoff, BRP

ManagedHPC Benefits

- Improve productivity – allow your scientists and engineers to focus on work, not administration

- Increase system utilization and up time

- Provide predictable costs for budgeting

- Provide peace-of-mind that technical challenges will be addressed responsively

- Support a wide range of applications including Ansys, Dassault, and Autodesk

"X-ISS has been able to...proactively handle technical issues so we could focus on working with the Engineering staff..."

- David Crass, University of Wisconsin
