### What Is SAO?

Altair SAO is our advanced tool for software asset optimization, built so you can right-size your organization's software portfolio using real data to make informed business decisions.

With software asset optimization from Altair SAO you get an easy-to-use data collection, analysis, and visualization solution with 70+ reports, plus SAO Predict to tune your current configuration and guide future capacity planning.

### Why SAO?

#### Reporting & Analysis

Get a bird's-eye view of license usage plus a hierarchical breakdown by department and region.

#### License Optimization

Pinpoint underutilized assets for more efficient budgeting.

### Future Planning

Explore configuration alternatives using a virtual license manager

### SAO Features

#### Detailed Reporting

70+ configurable usage and analytics reports with extensive drill-down capabilities.

#### Admin Tools

License expiration, vendor management, agent configuration, roles, region and department hierarchies, and more.

#### SAO Predict

Our "what-if" simulator helps organizations control license costs and plan for future capacity.

#### Costing Module

Optimize software purchases and control spending with the SAO costing module.

An easy-to-use data collection, analysis, and visualization solution to support data-driven planning and decision-making

**Customization**

We'll develop a powerful SAO solution tailored to your organization's unique requirements.

**Third-party Support**

Support for over two dozen third-party license managers.
