

Why Choose OSI for Recertified / Refurbished Hardware?

Global Presence

With 8 distribution warehouses and 20 offices spanning across 3 continents, OSI can quickly configure, test and ship equipment anywhere in the world at a moments notice.

Huge Inventory & Same Day Shipping *

OSI stocks a \$25M inventory of enterprise servers, storage, and networking hardware. Same day shipping is available for most products, however if a customized configuration is required, lead times may vary.

Product Expertise & Speed of Service

OSI has a veteran team of experienced product specialists and technical engineers that are some of the best in the business. Our team can make product recommendations and usually can turn around quotes in just a few hours.

Save 50-90% vs OEM

Getting the budget approved for tech refreshes and other IT initiatives can be a challenge in today's current economic climate. Leveraging recertified or refurbished hardware can free up significant budget for your organization to accomplish more with less.

Benefits of Recertified / Refurbished Hardware

- Significant Cost Savings vs New Retail
- Extend Life of Equipment to Increase ROI and Lower TCO
- Same Day Shipping For Mission Critical Projects*
- Fully Tested Equipment & Free Configuration Services Available Upon Request
- Short-Term Rentals (Swing Boxes for Migrations, Proof of Concept, etc.)

* Same day shipping is available for most products ordered by 4PM EST. If configuration is required, lead times may vary.

OSI stocks a huge selection of certified pre-owned, refurbished, open-box and new-in-box data center products from all the major OEMs. Here is our line card:
