

Children's Hospital of Orange County Division Experiences **Unparalleled** **Satisfaction** with GoCheck Kids

Children's Hospital of Orange County (CHOC) has 174 pediatricians across 14 pediatric locations in Orange County, California.

CHOC has an excellent reputation in their community. It is known for the quality of its doctors, their clean facilities, efficient financial front office administration, and willingness to adopt new technology to improve patient care.

CHOC piloted GoCheck Kids in their Sea View Pediatrics Division. During the pilot, they quickly realized a return on investment and unparalleled provider and parent satisfaction and decided to roll it out across the network.

Our primary concern was finding a way to conduct vision screening tests for patients ages 1-3 who were too young for a visual acuity test.

We found GoCheck Kids at the AAP conference. Since there were no upfront costs to pilot, we decided to pilot the solution that November.

After a successful pilot, we decided to adopt GoCheck across all 14 practices in our group.

To Date, CHOC's Network Wide Clinical Impact

Delighted Providers and Parents

"Our nurses and parents love the ability to get immediate results upon screening. Our nurses love its ease of use. It takes so little time to get the screen. GoCheck Kids service is excellent and the training for our staff was unparalleled. We love working with the GoCheck Kids team!"
