

At GSK, relationships with healthcare professionals are built on trust and transparency.

# Collaborate With GSK to Advance Science and Medical Education

## SHaring Anonymized REsearch Data (SHARE)

*GSK is part of a clinical study sponsor consortium that provides access to anonymized patient-level clinical data for further research that can advance science or improve patient care. Learn more and request access at:*

[www.clinicalstudydatarequest.com](http://www.clinicalstudydatarequest.com)

## Independent Medical Education (IME)

*GSK identifies and funds innovative high-quality independent medical education designed to enhance healthcare providers' knowledge, competency and performance to improve patient health.*
