250 Videos

1500+ Newborn Care Packages

Noteworthy

CDH International is the world's oldest and largest CDH charity, founded by 2 moms on a kitchen table with just a typewriter in 1995. The organization was the first to use a model of "support, awareness and research", which has been imitated by 100's of others non-profits for various causes.

In 1997, CDHi was one of the first non-profits on-line and has grown to be the worldwide leader for CDH raising awareness through media, social media and an international level.

With an annual budget of just \$250,000 with a staff of 3 employees and 100 volunteers, our organization has an overhead of just 9% and self-audits annually.

CDHi helps fight Congenital Diaphragmatic Hernia by providing information, matching families, financial grants, scholarships, care packages, local events, international conferences, the CDH Research Survey and much more at no costs to families.
