

Centrally Integrated Parking Solution (CIPS Network)

An integrated network that allows innovative parking management companies to seamlessly link with complementary systems using Smart City Technology

The Problem

Municipality now
routinely deal with
***half a dozen or
more different
systems***

**Very few, if any, communicate with
each other!**

- On Street Meters
- Ticketing Devices
- Parking Permit Systems
- Mobile Enforcement Applications
- Pay by Space/Plate kiosk
- Booting Systems
- Tow Management

The Solution

Central Integrated Parking Solution Network

Integrates vendor parking applications

Provides standardized APIs

Real-Time and batch data exchange

Increases Revenue Opportunities

The Concept

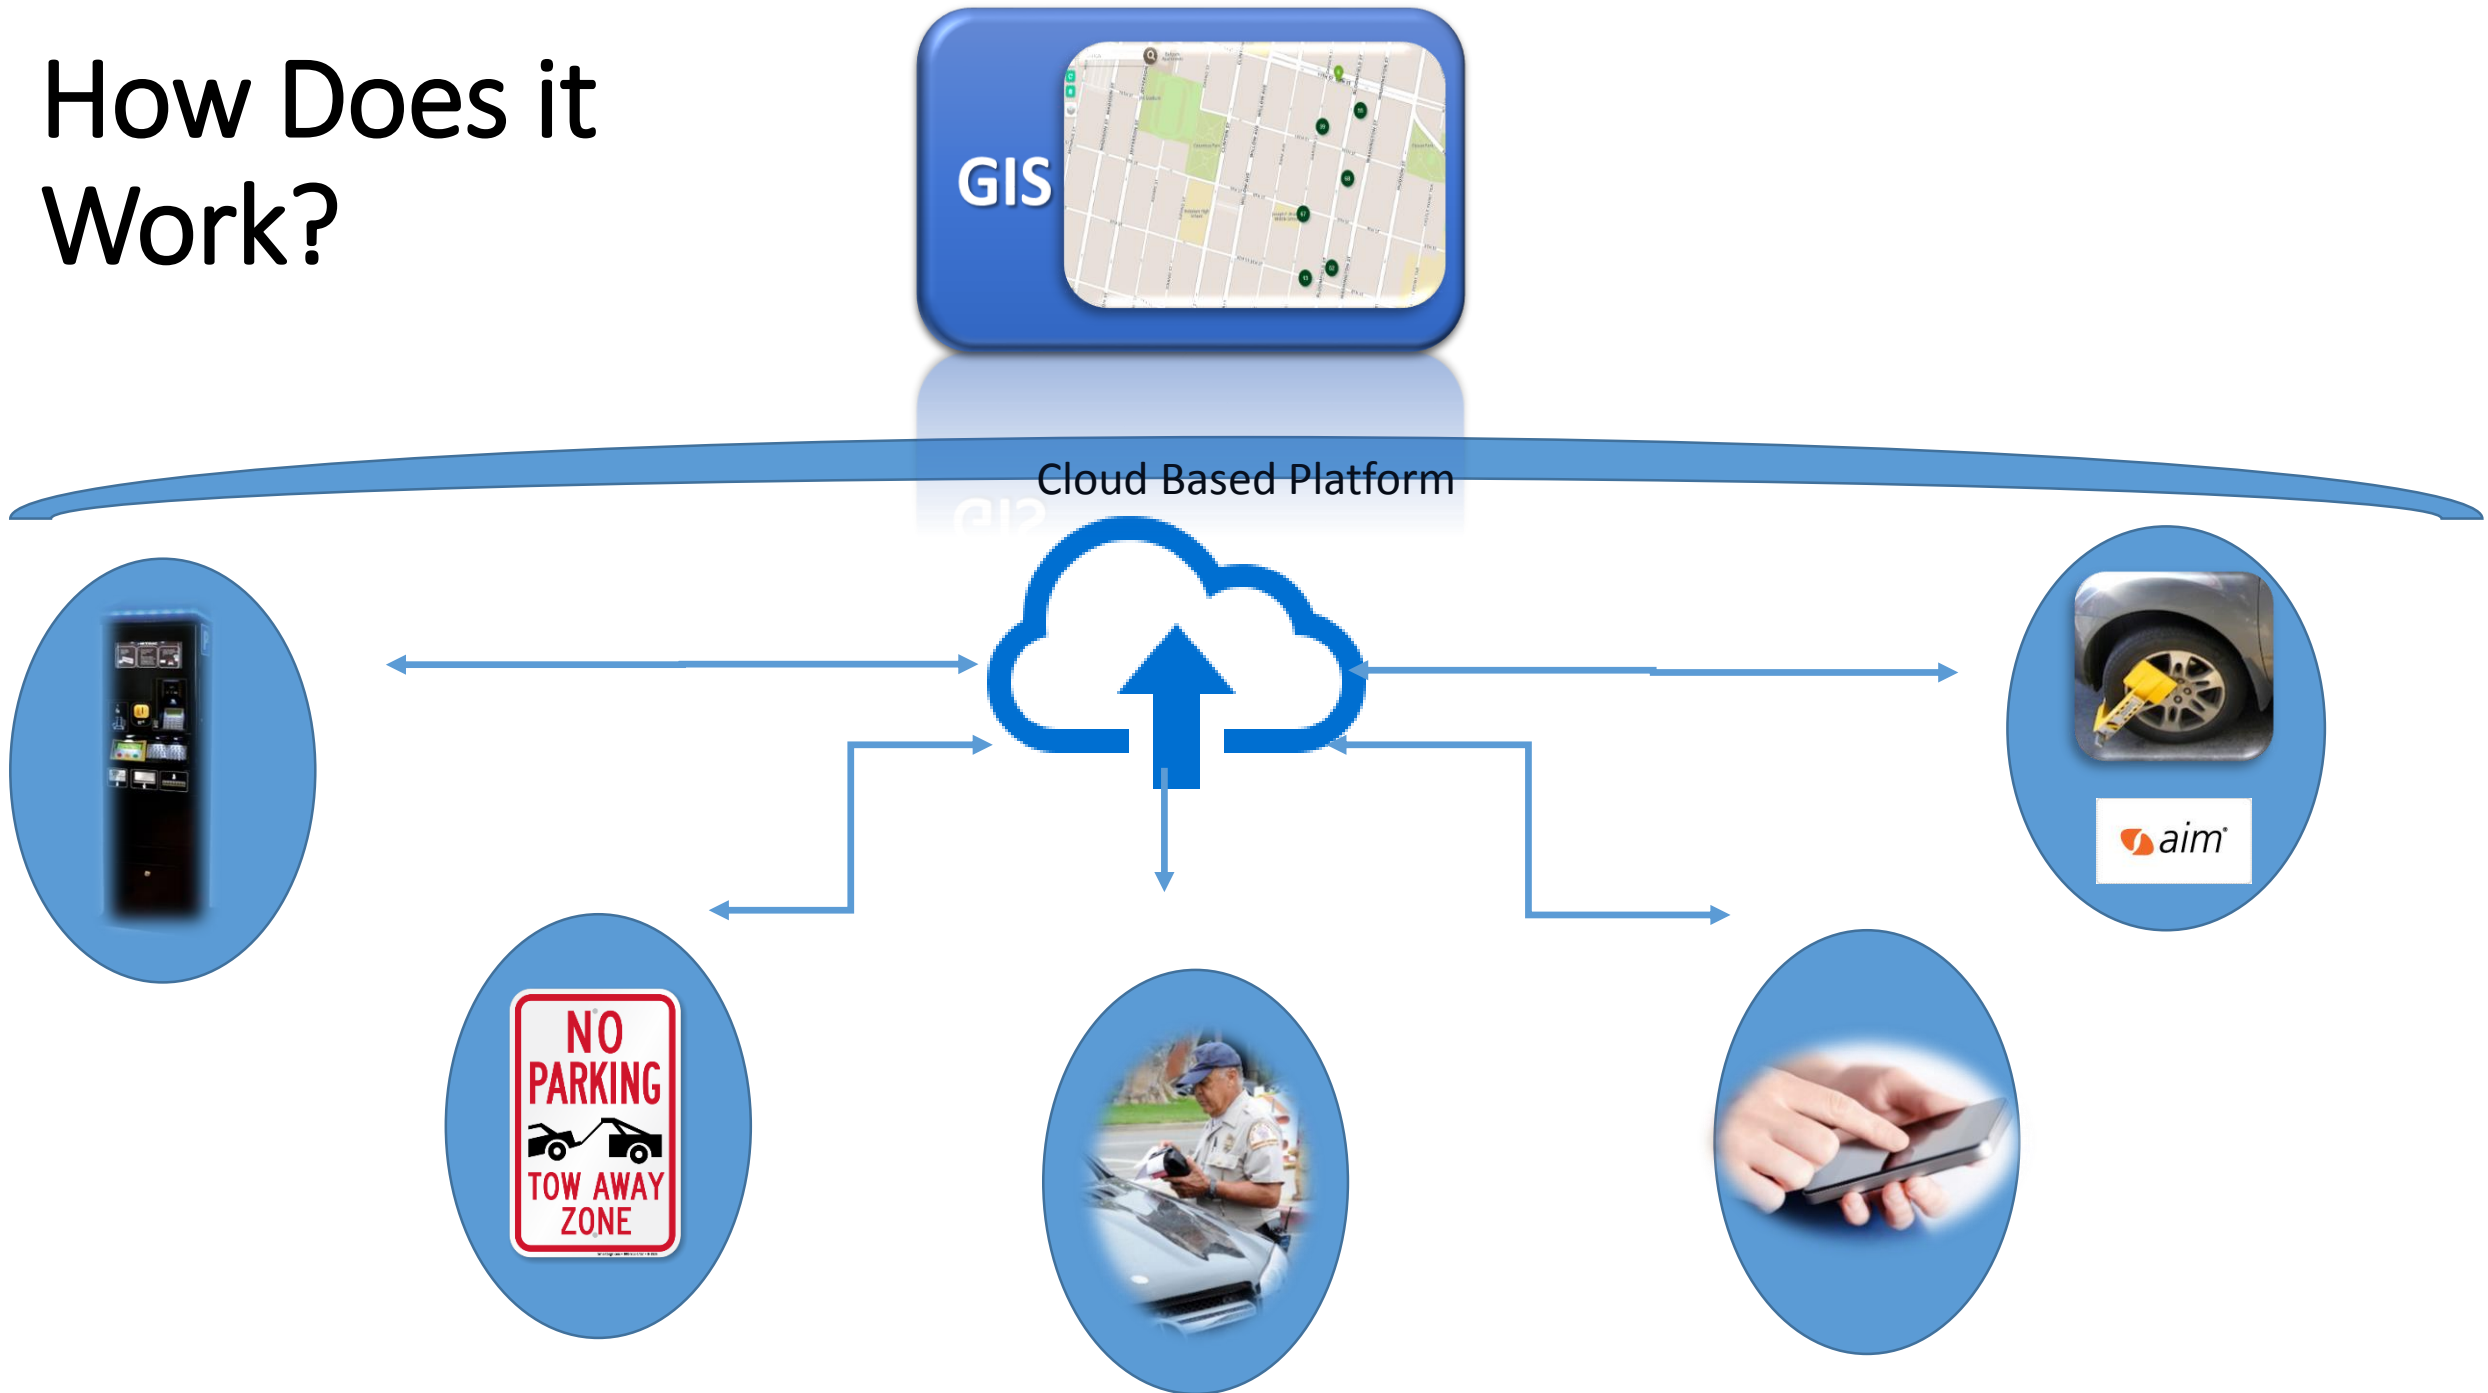

- We use the same business model of the early ***STAR***, ***PULSE***, and ***PLUS*** ATM banking networks.
- We provide a national network that allows independent parking solution vendors to share key transactional data.
- We ensure all vendors can integrate key data points

The Benefits

- Increase revenue by automating enforcement
- When clients know that your parking application is CIPS compliant they are assured that it will integrate with other vendor solutions that fill their need.
- Lower cost because of non-duplicated services
- Reduced manual workflow processes
- Maximize existing workforce “*Do More with Fewer FTEs*”

How Does it Work?

Some of the Vendors in the CIPS Network

- **GIS Mapping/Geospoc**
- **ALPR** camera systems
 - **ELSAG**
 - **Genetec**
- **Nobel Systems AIM**—Dispatch and Towing Management
- **Pay-Lock Bootview**— Digital Permits, Boot Management
- **ParkMobile** – Mobile PayByPhone consumer facing application
- **Metric Aslan** – Ticket/Ticketless Parking Meters & Kiosks
- **Individual Tow Operating Companies** – Vehicle towing and impounding

See Solution in Action

- Parking Map Link: [TNP Sign Location Map](#)
 - This map shows real time Temporary No Parking Sign posting locations
 - Allows residents and visitors to see where they should not park even if sign has been damaged
 - Real time update 24/7
 - Can learn where future TNP sign locations will be posted (14 days in advance)
 - Works on any mobile device or web browser
