

# Is your Indoor Air Quality the best it can be for Virus Removal?

T&M Associates understands the challenges that our clients face in a post COVID-19 environment. In addition to close contact with infected people and contaminated surfaces, there is a possibility that the spread of COVID-19 may also occur via airborne particles in indoor environments – in some circumstances beyond the 6 foot range encouraged by social distancing recommendations.

We understand the issues and can provide solutions that best fit your needs:

## Who can T&M help?

Offices, Manufacturing, Municipalities, Healthcare, Warehouses, Schools, County Agencies, Utility Authorities, and Water Treatment Facilities

## What Indoor Air Quality services does T&M provide?

- Risk assessments
- Compliance with NJ IAQ Standard
- Work process evaluation and employee industrial hygiene protocols
- Qualitative Exposure Assessments
- Ventilation System Evaluations and Conformance with ASHRAE Standards
- Enhanced Indoor Air Quality (UV Light Technology/Bi-Polar Ionization)
- Increased Air Filtration

## Where can T&M provide these services?

Across the metropolitan USA.

## What is the value of this service?

Peace of mind that you are doing all you can to protect your employees and clientele during this unprecedented time.

## WHY T&M?

T&M's Industrial Hygiene Practice is comprised of Indoor Air Quality experts and Mechanical and HVAC technical experts. These experts are Professional Engineers and Certified Industrial Hygienists who specialize in workplace indoor air quality. Our depth of experience and knowledge can be of service to you in developing a customized indoor air quality plan.
