Other US and Foreign Patents Pending.

Tarp System Innovation
Since 1944

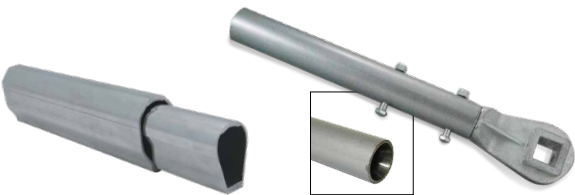

EASYCOVER®

Tarp System

Easy Cover® is Aero® Industries' best-selling, most versatile front-to-back dump truck tarp system. It features the strongest spring and arms in the industry for consistent quality performance and unsurpassed durability. Engineered and manufactured to Aero's industry-leading standards, Easy Cover is available in a variety of electric or manual models.

Aluminum Or Steel Arms

- Shape of the arm extrusion makes our arms the strongest, yet lightest-weight aluminum arms in the industry
- Unbreakable with normal use
- Polished aluminum arms and steel arms available
- Both aluminum and steel arms are easy to install and adjustable to fit nearly any size dump body

Industry's Most Reliable Electric Motor

- Proven motor design
- Motors backed by 3-year warranty
- Chrome cover

Adjustable Wind Deflector

- No cutting or drilling required
- One-piece adjustable deflector
- Available with or without end plates
- Reduces drag
- Extends tarp life

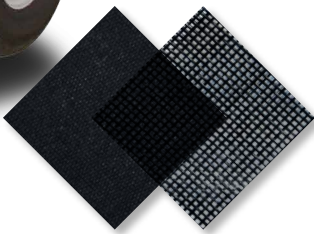

Tarp Housing

- Pre-assembled tarp housing ideal for trailers with radius or diagonal front corners
- Aerodynamic design
- No welding
- Reduces drag
- Extends tarp life

Pictured with Integrated Cab Shield. Wind Deflector and End Plates are not required with this mounting step up.

Pictured With Optional Second-Arm

Tarp Types & Colors

- Available in asphalt grade or mesh material
- Two standard widths 7' or 9' with optional expandable bungee
- Custom tarps and colors are available at an additional cost

Industry's Best Manual Crank

- Smooth, one-handed operation
- Operates from the ground
- Positive locking ratchet and pawl
- Works in conjunction with friction brake to ensure safety and ease of operation
- Available on Easy Cover Model 400 Series

Easy Cover® Spring Options

PowerPack Sidemount Spring

- Industry's strongest, side-mount spring (patented double helix)
- Housing provides protection from the elements and is easily installed
- Universal design eliminates need for left and right spring
- No welding required
- Ideal for dump truck and trailer bodies up to 28'

Undermount/Underbody Spring

- Industry's best undermount spring
- Quick and easy to install
- No welding required
- All components are plated or powder coated
- Ideal for dump truck and trailer bodies up to 40'

5-Spring Mount

- Industry's strongest spring
- Ideal for limited mounting space
- No welding required
- Ideal for trailer bodies 34-38' in length

Series Spring Assembly

- The Series Spring has enough torque in the covered position to keep the arms from lifting and bouncing.
- Series Spring is designed for optimal tension on the tailgate in the high mount position. This spring system can be mounted high or low on the dump body.
- Springs are active in providing torque for 280° of rotation. Two sets of springs work together in series to double the range of motion from 140° to 280°

10-Spring Mount

- Utilizes Aero's patented Double Helix Spring
- Easy to install or replace
- Provides optimal strength and power
- Only available with Easy Cover Model 595 (Scrap & Demolition)
- Ideal for longer trailer bodies up to 53'
