(See our free Thank You Gifts at the end of this letter)

Experience the Benefits of Our System
- Increase Revenue
- Improve Efficiency
- Reduce Manual Workflows
- Automate Enforcement
- Monitor Data in Real-time

Products and Services

CIPS - Complete Parking Management

Centrally Integrated Parking Solution (CIPS), integrates your parking applications while providing real-time parking data.

CIPS integrates your parking meters, ticketing devices, parking permit systems, kiosks, booting systems, and tow management all in one interface.

CIPS - ALPR

Reduce your LPR Complexities and Costs
CIPS aids Parking enforcement agencies to increase revenue, improve efficiency, and maximize manpower, all while reducing their overall LPR operating complexity and cost.

Supervisors can also monitor violations in real time, 24/7, and assign PEOs to areas with the highest concentration of violations.

CIPS identifies up to five times more violations than current systems. The increased parking revenue provides a return on investment in fewer than six months on a three year system with a cost as low as **$1.65** per ticket written.

CIPS - Integrations

CIPS integrates with the many major parking software and applications. This enables you to quickly implement CIPS without having to replace all your current systems and vendors.

Current Partners:

CIPS – Virtual Parking Permits

CIPS' enhanced virtual system is designed to make it both faster and easier for municipalities to enable their residents to purchase and activate temporary parking for visitors and guests.

- 100% online, available 24/7
- No need for in vehicle signs, hang tags, decals, or paper printouts. Save time by eliminating trips to the City Parking office.
- Residents can purchase and activate their V.P.P's on any internet-enabled device like a desktop computer, tablet, or smartphone.
- The activation portal has an easy to use streamlined interface
- Text message notifications for activation and expiration
