Music Made for the Great Outdoors

“ It was like Christmas here the other day as we excitedly tore open boxes. The Sonora came out amazing. It’s stunning! Everything was packed and shipped perfectly! Thank you for all you have done! Truly beautiful!”

Cape Cod Children’s museum

There is something special about music that crosses barriers and encourages closeness regardless of age, race, religion and background. Add in the therapeutic environment of nature and the great outdoors, and there are few things more enjoyable than musical play.

It is this sentiment, combined with over 20 years’ experience in the play industry that sits at the heart of Percussion Play. We strongly believe that outdoor musical instruments tick all the boxes, offering cognitive, emotional and physical play opportunities for everyone, everywhere.

Our instruments are easy to play for all ages and abilities and are either pentatonically tuned (for easy improvisation with no clashing notes), or diatonically tuned (so that the user can play familiar or favourite tunes as well as improvising or composing their own).

All of our instruments are handmade at our workshop in Hampshire, UK before travelling to play areas across the world. We take real pride in every piece we produce, creating durable instruments that are designed to stand the test of time and bring joy to all who play them.

Whether your outdoor area (or budget) is large or small we are sure you will find a suitable and exciting outdoor music solution within these pages.

Knowledge Base

Our online knowledge base is designed to help you find the information you need to create the perfect music park. It is full of relevant and compelling content such as:

- Case studies and testimonials from around the world.
- Free white papers on a multitude of music, play and health related topics.
- Best practice advice including guides to creating a sensory garden or outdoor music trail or playground.
- Our app containing videos of our instruments, data sheets and product-specific installation instructions.

Visit www.percussionplay.com/knowledge-base for more and follow our social media for latest news, product innovations and events.

Installation

We realise that installing your own instruments may seem a little intimidating but as well as being easy to play, our instruments are designed to be easy to install.

We assemble each product as far as possible before shipping and send clear, easy to follow installation instructions for each instrument.

Schools & Nurseries

Outdoor musical instruments present schools and nurseries with an excellent way of incorporating outdoor education into the day-to-day curriculum. They make creative, all-inclusive and accessible playground equipment and fantastic music education resources.

Children love the fact that music can be used in a context outside of the classroom and their clever design and use of the pentatonic scale, makes them so easy to play that children are able to develop musical skills without having to manage any technical demands of traditional instruments, instantly showing what can be expressed and achieved through music.

Locating our instruments in the school playground, outdoor performance area or perhaps a sensory garden where children can explore, create and develop their own musical ideas and sounds whilst enjoying the fresh air and sunshine, will maximise the musical potential of a child during their most rapid developmental period while they happily discover the joy and empowerment of music making.

“ Wanted to let you know that we LOVE our new musical instruments. They sound amazing !!! ”

Barrets Elementary School

Special Needs

Music can have a profound effect on anyone, but the benefits of exposing a child or adult with special needs to music can be huge.

Simple to play, our outdoor musical instruments enable creative experimentation and tactile exploration, they encourage the use of motor skills, help develop coordination and stimulate the imagination. For children with very limited movement, the placing of their hands on the vibrating lids of our drums or along the Emperor Chimes, can elicit a positive response. Playing music may be an effective way to stimulate speech development and communication skills, express emotions and provide opportunities for physical, cognitive and motor development whilst creating an environment for socialisation and fun.

Ideal for use during both music and occupational therapy sessions with their harmonic pentatonic scales and accessibility, children who experience physical or emotional obstacles in their lives can achieve security and joy in making music outdoors.

“ We’re very happy! Staff working with pupils with more complex physical needs have reported that the instruments are great motivators during physio and OT work. ”

Medina House, Community Special School

Elderly Care & Hospitals

Nature and music are intimately connected and combining the therapeutic effects of being outdoors, along with the healing energy of music, can help to fuel the senses and become a welcome addition to the daily routine for seniors living in a care environment.

Our instruments provide opportunities for music making for all adults regardless of musical experience and active music-making can be such a rewarding experience.

Playing music together is a way of communicating and music helps to enhance sociability and create opportunities to forge and retain relationships, as well as offering a way to connect across generational barriers. Intergenerational music making with family members, other residents, visitors or carers, encourages interaction between all ages.

Music for the young and young at heart!

“ The musical instruments are a great success! They have encouraged the residents outside, to take longer walks, laugh, talk and socialise. ”

Aldersro Elder Centre, Director

Parks & Trails

Outdoor musical instruments are perfect for parks, trails and recreation areas. Fully inclusive, accessible and multi-generational, our instruments make music-making possible for would be musicians of any age or ability.

Constructed of durable, easily cared-for materials, the instruments are low maintenance and require no safer surfacing. Whether in a small town or mega - city, they make original, unusual additions to any number of public outdoor spaces.

Our case studies, white papers and testimonials all confirm the benefits that music can bring to a community and how outdoor musical instruments in a park or open space provide opportunities to access music-making to people who may not otherwise be able to.

Musical instruments in outdoor community spaces engage people of all ages, cultures, and ability. Music-making in the great outdoors brings people together in a way that few other activities can.

“ Everyone is impressed with the instruments, their build quality and sound. ”

Conner Prairie Interactive History Park, Indiana

Babel Drums

Small - C Major Pentatonic - C4-C5
Large - G Major Pentatonic - G3-B4

Babel Drums are circular stainless-steel tongue drums fixed for permanent outdoor installation.

Available in two sizes, the small Babel Drum is the higher-pitched of the two with six notes producing a warm, resonant sound. The large has an eight-note layout producing desirable tones with remarkably long sustain.

Both Babel Drums offer a unique hand-drumming experience. No previous drumming experience is required to play a Babel Drum and both children and adults will enjoy improvising with the mesmerising sounds they produce. The mellow tones are never brassy or too loud - perfect for musical exploration in the fresh air.

Cajón

Cajóns are perfect for outdoor performances. Durable, responsive and easy to play they have an in-built snare at the top and a low bass sound around the middle suitable for many different styles of music.

Inspired by the traditional Cuban and Peruvian Cajón drums, our version has a resonating box made from stainless steel making them ideal for year-round outdoor use.

They are attractive, sturdy and can double up as a seating solution; several Cajóns together form the perfect drum circle.

Djembes

With their distinctive goblet shape, Djembes make a wonderful addition to a music park, trail or urban space.

The large head size allows multiple beats from low to high with players able to create unique and versatile sounds by hitting or slapping the different areas of Djembe's 'head' with their hands.

The stainless-steel body makes this a smart choice for urban environments delivering high-class performance and featuring robust construction for enhanced durability.

Floor Piano

Baby: C5-C6 Chromatic
Grand: C5-C7 Chromatic

We are proud to introduce our first fully chromatic mechanical floor piano, whose sub-surface bells create clear and distinctive chimes on impact.

Available as a thirteen or twenty-five note instrument, it is sure to bring a smile to your face - especially if you've seen the Tom Hanks movie 'Big'!

Our Floor Piano is constructed from stainless steel and aluminum and is designed to be installed completely level with the ground for safety and easy use in schools, parks and other public spaces. The Floor Piano is engineered to suit all environments.

Sansa-Rimba

C Major Diatonic - C4-C6

Sansa-Rimba is a clever blend of two African instruments; the Sansa (thumb-piano) and a Marimba (xylophone) with its 15 notes ascending from the centre outwards.

Just as fitting in a school playground or music trail as it would be nestled in a care home garden, this compact instrument is easy to play and a perfect introduction to musical exploration and improvisation.

Also available with aluminum resonators between heavy-duty HDPE sheets (only in black). Recommended for public and high use areas.

Features

Bell Lyre

Our Bell Lyre is made of 8 graduated stainless-steel bells presented within a beautiful contemporary stand reminiscent of a lyre.

Easy to play for all ages and abilities, the bells ‘sing’ when struck with the attached pair of beaters.

With an easy single post installation, the Bell Lyre is a low maintenance calming addition to any outdoor setting and a charming statement piece.

Specification

Weight	- 19 kg	42 lbs
Width	- 73 cm	29 in
Min Height	- 29 cm	12 in
Max Height	- 153 cm	60 in

Cherub

C Major Pentatonic - C4-C6

The Cherub's 11 tubular bells are made from hand tuned, heavy duty anodized aluminum and produce a clear, bright sustaining tone when struck.

The Cherub can be wall mounted or affixed to posts for easy installation.

Also available with aluminum resonators between heavy-duty HDPE sheets (only in black). Recommended for public and high use areas.

Specification

Max Height	- 235 cm	93 in

Emperor Chimes

C Major Pentatonic - C3-C4
C Major Triad - C3, E3, G3

Emperor Chimes are the ultimate in outdoor musical chimes. They should be played gently with fingertips or the palms of the hand.

With the largest chime standing over 2.5m (8ft) in height, these chimes are available in a full pentatonic set of six or in a harmonic group of three.

Because they are played by hand, they produce soft, velvety rich tones with an excellent sustain.

Specification

Weight	- 117 kg	258 lbs
Width	- 13 cm	5 in
Min Height	- 179 cm	70 in
Max Height	- 249 cm	98 in

Composed

MyTunes

My Tunes are a unique concept and great fun to play for all ages. Anodized aluminum notes are suspended between stainless steel posts and arranged sequentially so that by simply striking the notes in order a familiar tune is played.

Choose from well-known favourite songs or personalise to suit the instrument's location or target audience. Some examples of our My Tunes projects to date include:

- Star Spangled Banner
- Teddy Bear's Picnic
- Grand Old Duke of York
- Old MacDonald had a Farm
- I do like to be beside the Seaside
- Frere Jacques
- Amazing Grace
- Darling Clementine
- Ode to Joy
- O Canada

Papilio Bells

C Major Pentatonic - C4-C6

Papilio – with a name derived from the resemblance of its elegant shape to that of the Butterfly - is a tubular bell type metallophone with notes of suspended anodized aluminum tubes supported by a stainless-steel frame.

The wide span of the Papilio means it can easily be played by 4 players - an opportunity for people of all ages to play alongside each other, plus the pentatonic nature of the instrument means there are no wrong notes.

Tubular Bells

C Major Pentatonic - A3-C5

Tubular bells are a visual and sonic delight for all ages.

The mid-range tone is not only heard but felt too. Simple yet striking, these bells will bring an architectural dynamic to your chosen outdoor area, as well as an amazing auditory experience.

Available as a set of 7 or individually. We recommend that they are installed in a horseshoe arrangement, so that when inside the curve you are literally 'bathed in sound'.

Marimba

C Major Diatonic - C3-C5

Our outdoor Marimba is big enough for up to four people to come together and play at any time.

This Marimba offers an enjoyable and exciting way to explore music making and is great for improvised play and performances.

Tuned diatonically to C Major C3-C5 scale, when hit with the attached beaters the Marimba makes a mellow, rich sound.

Specification

Weight	- 37 kg	82 lbs
Length	- 158 cm	62 in
Width	- 93 cm	37 in
Max Height	- 86 cm	34 in

Features

C Major Diatonic - C4-C6

Wall Marimba

Our Wall Marimba combines musical creativity with space-saving efficiency.

The fifteen diatonic C Major C4-C6 notes are made from polished GRP designed to look like Purple Heart hardwood which creates a distinctly happy sound.

The Wall Marimba is stable and robust making it perfect for installation in patios, courtyards or smaller children's playgrounds.

Wall mounted outdoor musical instruments such as the Wall Marimba provide the perfect solution to liven up a difficult or overlooked area and work well where there is limited space available such as courtyards, covered patios and other outdoor structures or classrooms.

Tembos

C Major Pentatonic - C3-C4
C Major Diatonic - C3-C4
Blues Scale - G, Bb, C, Eb, F, Gb, G

Quirky and intriguing with a great sound to match, our range of plosive aerophones called Tembos are made of stainless steel tubing.

Tembos (Swahili for elephant) produce bouncy, exciting sounds when the ends of the 'trunks' are hit with the neoprene paddles.

Available in three different tunings; Pentatonic for easy improvisation with no clashing or dissonant notes, Diatonic so players can play familiar or favourite tunes as well as improvising or composing their own and finally Blues Scale which produces a very familiar deep bluesy sound.

Features

Features

C Major Diatonic - G3-C5

Handpipes

Our Handpipes are another example of 'plosive' aerophones designed to be played with the hands as the name suggests, to create a funky sound.

The diatonic tuning allows access to hundreds of tunes, allowing the player to improvise and experiment to their heart's content.

A high-density polyethylene (HDPE) mounting sets and aligns the instrument, so once installed all that's left to do is play!

Specification

Weight	- 25 kg	55 lbs
Length	- 91 cm	36 in

Trio Ensemble

This popular ensemble is an impressive and striking trio. It can accommodate over a dozen children.

This set consists of seven Tubular Bells, our large Babel Drum and the anchor of rhythm, the Rainbow Sambas. With a variety of pitch range and tonal character, everyone is sure to have their favourite piece.

Rainbow Sambas
Tubular Bells
Large Babel Drum

Soprano Quartet Ensemble

Medium Congas
Small Babel Drum
Cadenza - Maya
Soprano Pentatonic Freechimes

The perfect choice for those projects where you need to squeeze the most out of your budget and create a resounding impact.

This mixed quartet of instruments comprises our compact but punchy Cadenza, a Babel Drum and Soprano Pentatonic Freechimes. Spanning two octaves from middle C to C6, players will be making harmonious music together almost instantly. The set also includes a pair of Congas to help keep a steady beat going.

Cadenza available with aluminum resonators between heavy-duty HDPE sheets (only in black).
Recommended for public and high use areas.

Alto Quartet Ensemble

The Alto Quartet is the bigger sibling to the Soprano Quartet Ensemble.

An ideal solution for when you've got more space to play with and a little more budget. This quartet consists of the Duo Cupla - offering both aluminum and GRP notes, a towering set of three Emperor Chimes, our Alto Diatonic Freechimes and a complete Congas Trio.

Duo available with aluminum resonators between heavy-duty HDPE sheets (only in black).
Recommended for public and high use areas.

Congas Trio
Emperor Chimes - Triad
Duo - Cupla

Quintet Ensemble

Cherub
Sansa-Rimba
Akadinda
Tubular Bells
Rainbow Sambas

The Quintet Ensemble of musical instruments offers a well-rounded range of tones and resonance.

Anyone can take the stage and play improvised music with no tuition or acknowledged musical ability. This popular collection provides a varied range of tones and sounds that blend effortlessly into beautiful music. Comprising of: Cherub, Sansa-Rimba, the warming Akadinda, a set of seven Tubular Bells and the Rainbow Sambas.

Sansa-Rimba & Cherub available with aluminum resonators between heavy-duty HDPE sheets (only in black).
Recommended for public and high use areas.

Street Quartet

The Street Quartet is designed for the toughest environments. Elements of 316 stainless steel, aluminum and HDPE combine for ultimate durability in areas of high use.

All instruments are played with hands only (no mallets)

Cajón
Emperor Chimes
Babel Drum
Handpipes
