

# YOU NEED SERIOUS SAFETY EQUIPMENT

## THE DEADLY DANGER

Lightning strikes kill approximately 100 people per year and severely injure more than 1,000 people per year in the US.

Lightning strikes cause more human deaths and serious injuries than:

- tornados
- hurricanes
- floods.

Outdoor sporting events put children and spectators at great risk. The most dangerous activities when lightning is near are:

- field games such as baseball and soccer
- swimming and water recreation
- golf

THE PUBLIC  
EXPECTS  
SAFETY  
TO BE  
THE TOP  
PRIORITY.

## THE PROBLEM

Lightning safety is often based on guesswork or low-cost devices with limited accuracy. This approach exposes people, especially children, to unnecessary and potentially fatal risk.

LIGHTNING STRIKES  
ARE SCIENTIFICALLY  
UNPREDICTABLE.

In fact, most lightning strikes on people occur ahead of or behind the storm.

WHEN  
YOU HEAR  
THUNDER,  
YOU ARE  
ALREADY  
AT RISK.

# STRIKE GUARD

## THE SOLUTION

Strike Guard by WXline is a scientifically proven, patented, fully automated lightning detection and warning system. It tracks actual lightning strikes and issues an alarm based on proximity.

Strike Guard offers:

- Detection up to 20 miles away
- User-selectable Caution, Warning and Alarm ranges
- Audible and visual alarms with **no false alarms**
- Automatic "All Clear" notification
- No cleaning or calibration required
- Optional PC-based StrikeView software for automatic e-mail, text messaging or pager notification
- Lightning-proof components with high-capacity battery backup power
- Warranty protection

MOST  
LIGHTNING  
CASUALTIES  
ARE  
PREVENTABLE.

## ASSET PROTECTION

Lightning strikes cause nearly \$5 billion in equipment and property damage each year.

But valuable assets can be protected to avoid the cost and hassle of equipment replacement and business interruption.

Strike Guard can be programmed to automatically shut down irrigation systems, controllers and other critical electrical or electronic equipment.

Satisfied clients come from many different industries, including:

- Aeronautics
- Manufacturing
- Military Applications
- Mining Operations
- Municipalities
- Recreation Venues
- Resorts
