

Document Management Cooperative
CO-OP# "65MCECCPS"

What ESCNJ Members are saying about us!

Pam Borek

Township Clerk Hillsborough and Clerk of the year honorary

I contracted with Foveonics Document Solutions in 2018 to provide a scanning and software solution that would help eliminate paper and to gain digital access to our documents. Foveonics is providing scanning services to Police, Building and my office and now digital images are accessed through Foveonics Cloud Based Solution. Foveonics Cloud Based Solution has an approved migration path which will allow us to destroy the documents once we go through the process. The image quality is very good and can be easily searched. In 2019 we plan to roll this process out to more departments.

Mike Pappas

Business Administrator Borough of High Bridge

Foveonics has provided an invaluable service to our municipality. Their services has made our responses to OPRA requests that are related to property closings much quicker and more efficient. The savings of staff time has been well received by staff as well as those requesting these documents.

Tom Brown

Deputy Surrogate Bergen County

Foveonics possessed a clear and solid knowledge and understanding of Record Management. They have proved themselves to be a step above their competitors. Foveonics scanned two phases for Bergen County resulting in nearly 2 million images from 1900 to 1994 into their Cloud Based Solution.

Christina Ariemma

Borough Administrator/Clerk, Borough of Garwood

Choosing Foveonics was one of the best decisions of my career. Not only did they digitize all of our construction records, but the software program used to search and retrieve the records was up and running in a few hours. This cut our OPRA request searches from days and sometimes weeks to seconds, freeing up staff to help with other tasks.

Donna Luciani

Township Clerk Randolph

Before contracting with Foveonics Randolph Township had not established a Record Management plan. The township was seeking a partner who understood the process. Randolph Township has nearly 2 million images from Building and Planning to Tax Department on Foveonics Cloud Based Solution. Opra request can now be performed through Foveonics DocumentSync Software. This software has helped save the municipality time and money.

Heather Cheesman

Special Assistant to Burlington County Clerk

Burlington County has just began to use Foveonics for our verification, and it is a great product and service that is provided. It has been useful and accurate. Kathy, Supervisor of Recorders, was immediately impressed in the reports, the accuracy and the usability of the information. Our last vendor took months of communication to correct or modify the indexing rules so they would match our internal rules. We have used this company in other ways as well, back scanning, and have nothing but great things to say of the whole project.

Thomas Flarity

Business Administrator, Borough of Manasquan

Thank you for giving me an opportunity to comment on the great relationship Manasquan Borough has enjoyed with Foveonics over the past few years. There was a time when the Borough would routinely spend countless staff hours searching our construction, zoning and code enforcement hard-copy files looking for documents necessary to satisfy OPRA requests or to confirm the history of a particular property. To make matters worse, the files were maintained in several different locations and the filing system was less than optimal. In 2016, the Borough, in its effort to remedy these document storage problems, met with representatives of Foveonics. Foveonics surveyed the Borough's problems, confirmed that they could digitize our hardcopy files, and create an easily searchable electronic index that would save an immeasurable amount of time. The Borough contracted with Foveonics and in short order, Foveonics delivered, to the letter, on their promise. Today, the Construction Department is able to fulfill all manner of document requests at the push of a button, freeing up staff and allowing other office tasks to be tended to much more efficiently. In short, we couldn't be happier with the staff and service at Foveonics.

Brian Meneilly

Business Administrator, Borough of Stanhope

I have contracted with Foveonics over the last decade in varying capacities. As Deputy County Clerk Foveonics scanned several million documents and provided a Cloud Based Solution. Most recently, as the Business Administrator in the Borough of Stan Hope I contracted with Foveonics through the ESCNJ and once again I am very happy with the work that has been performed and how this will shape the municipality with future OPRA requests. The software that is used is scalable and will be deployed township wide.
