Discover ASRM's Career-Changing Affiliated Societies!

## Society of Assisted Reproductive Technologies (SART)

[www.sart.org](http://www.sart.org)

### **Mission:**

The Society for Assisted Reproductive Technology promotes and advances the standards for the practice of assisted reproductive technology to the benefit of our patients, members, and society at large.

### **Membership:**

SART is an organization of member clinics. For more information about joining SART, visit [www.sart.org/Membership](http://www.sart.org/Membership).

### **Why Your Clinic Should Join:**

SART helps its members achieve national and international recognition for their high standards by being a leader in the advancement of the knowledge of ART, information exchange, and the quantification of success rates.

To infertile couples and individuals, SART membership means that they are consulting with medical professionals who are among the top physicians and scientists in their field and are dedicated to patient care. To government agencies, insurance companies, and the public at large, SART represents a medical professional society committed to self-regulation and the highest professional standards.

## Society for Male Reproduction and Urology (SMRU)

[www.smru.org](http://www.smru.org)

### **Mission:**

To promote the advancement of our understanding of male reproductive physiology and management of male infertility by providing a forum for the dissemination of both basic and clinical research information and support of educational programs.

### **Member Types:**

**Active Membership:** Available to ASRM members with a special interest in male reproduction.

**Associate Membership:** Available to ASRM members who are residents, fellows or postdoctoral students with special interests in the male reproduction.

### **Why You Should Join:**

SMRU is a unique interdisciplinary principle of andrology and sub-societies which offers an excellent opportunity to network and keep up with the newest treatments and discoveries in male reproduction. As an advocate for the role of the male, SMRU is dedicated to the study and treatment of male infertility. The group advances the field by awarding the top six male ASRM infertility abstract authors with the coveted Traveling Scholars Award. SMRU also hosts an annual members-only dinner to facilitate connection among male reproduction specialists.

## Society of Reproductive Biologists and Technologists (SRBT)

[www.asrm.org/SRBT](http://www.asrm.org/SRBT)

### Mission:

The mission of SRBT is to advance the continuous professional development of scientists and laboratory specialists working in all disciplines of Reproductive Biology and applied Assisted Reproductive Technologies (ART).

### Typical Members:

Scientists, Laboratorians, Lab Directors, Embryologists, Andrologists, Researchers

### Member Types:

**Active Membership:** Available to ASRM members who have a special interest in reproductive biology, applied assisted reproductive technologies, and the reproductive laboratory as demonstrated through education, research, or employment.

**Associate Membership:** Available to ASRM members who choose to join and who are currently enrolled in an undergraduate (e.g. medical technologist), graduate (e.g., M.S. or Ph.D.) or postgraduate program (e.g., postdoctoral, residency, fellowship) who have a special interest in reproductive biology or technology.

### Why You Should Join:

Since its inception in 2010, the SRBT has become the vehicle by which ART laboratory professionals have maintained a presence and a voice in ASRM and in the field of human reproduction. Originating from a merger of laboratory technologist and reproductive biology professional groups, SRBT combines its members' collective talents to push the field forward in the best interest of patients. SRBT member benefits include a member discount on the ASRM eLearn® Embryology Certificate Course and free access to the results of a biennial salary survey.

## Society for Reproductive Endocrinology and Infertility (SREI)

[www.socrei.org](http://www.socrei.org)

### Mission:

To serve a leadership role in Reproductive Endocrinology and Infertility by:

- Promoting excellence in patient care
- Fostering the training and career development of students, residents, associates, members, and affiliates
- Developing new initiatives in basic and clinical research
- Supporting ethical practice and advocacy for the subspecialty

### Member Types:

**Active Membership:** Available to ASRM members who are ABOG Board-Certified Reproductive Endocrinologists.

**Associate Membership:** Available to ASRM members who are completing or have completed fellowship training in reproductive endocrinology, and are waiting to complete the Subspecialty Board Examination process.

### Why You Should Join:

SREI is dedicated to promoting excellence in patient care and fostering the training and career developments of student, resident, associate and affiliate members. The SREI Web Forum was created by physicians for physicians, whose purpose is to bring REIs together to share knowledge, research, and resources involving the field of reproductive medicine. This one-of-a-kind forum is open only to SREI Members and Associate Members.

In addition to educational content at the ASRM Scientific Congress & Expo, SREI also offers annual professional development events, including the Members' Practice Retreat and the SREI National Fellows Symposium.

## Society of Reproductive Surgeons (SRS)

www.reprodsurgery.org

THE SOCIETY  
OF REPRODUCTIVE  
SURGEONS

### Mission:

The Society of Reproductive Surgeons strives to promote excellence in gynecologic and urologic reproductive surgery by providing and encouraging professional education, lay education, and by fostering research. By achieving these goals, it is the belief that this Society will assure the highest quality of patient care.

### Member Types:

**Active Membership:** ASRM members with special competency and/or expertise in reproductive surgery as evidenced by their special training, practice, and recognized contributions to the field.

**Associate Membership:** ASRM members who are physicians, scientists, and others in the profession who are not surgeons but who have contributed to and worked in the allied fields of this specialty.

**International Membership:** Open to international members of ASRM with a special interest and competency in reproductive surgery.

### Why You Should Join:

From boards to the bedside, surgical excellence is fundamental to REI. Whether you are an REI, urologist, MIS, or have other strengths, the Society of Reproductive Surgeons (SRS) wants to help members live up to their potential. SRS membership (which is free for urology and REI fellows) provides networking and collaborative opportunities that would be rare for many early in their career, as well as expert insight for established clinicians. The group celebrates the diversity of its members and draws upon multiple fields for leadership and perspective. Beyond its role in the fellow boot camp, SRS has a listserv, literature reviews, a developing mentorship program, and offers other resources through membership.

## How to Join

Are you ready to connect with your colleagues in the field?

### Here's how to join:

If you're already a member of ASRM, you may add a Professional Group when renewing your membership, or contact the ASRM Member Services department to assist you if you wish to join mid-cycle.

If you're joining ASRM for the first time, you will have the opportunity to add Affiliated Societies at the time of joining.
