

For safe, reliable IVF shipping
TRUST CRYOPORT

When you need peace of mind that gametes will arrive at their destination, Trust Cryoport.

Cryoport is proud to provide you and your patients our exclusive CryoStork® IVF shipping services. We ensure precious gametes are handled with care from clinic to clinic, safely and securely. With the industry's most advanced logistics technology and end-to-end expert support, quality, safety and stability are ensured from start to finish.

Steadfast Protection

Navigate global cold chain logistics with our proprietary Cryoport Express® liquid nitrogen dry vapour shippers, which maintain -150°C for up to 10 days.

End-to-end Solutions

From point of origin to destination, Cryoport provides continuous tracking and monitoring, documentation assistance and 24/7/365 customer support.

100% Requalification

All Cryoport dewars are requalified after each use for physical suitability, cleanliness, LN2 capacity, and minimum required hold times. Dewars are removed from our fleet if the requalification specifications do not meet our internal criteria.

Validated Cleaning Process

Our cleaning protocol for cryo-shippers and all stainless-steel accessories reduces external contaminants by 99.9999%.

Intelligent Logistics

The SmartPak II® condition monitoring system tracks the key aspects of your shipment that could affect the quality and/or timing of your delivery. Continuous monitoring of the shipment tracks location (GPS), temperature, pressure, light, orientation, humidity and shock.

Insurance

Cryoport exclusively offers insurance options for the transportation of your patients' precious gametes. The insurance coverage provides additional peace of mind, extra protection and a financial safety net.
