Fire Records
Powered by FDM

Keep responders safer and make smart decisions with accurate data

WHAT IS THE PROBLEM?

Running a fire department is a difficult task. Agencies often find themselves juggling data from disparate systems in order to create reports. Disjointed data streams mean time is wasted trying to correlate information into a cohesive report to meet NFIRS and NFPA requirements as well as justify staffing and budget needs.

WHAT IS THE SOLUTION?

CentralSquare Fire Records is a fully integrated fire RMS that simplifies data collection, provides responders and administrators with relevant event summaries and is equipped with a robust report generation tool. Fire Records will help agencies make smarter decisions on resource deployment and budget expenditures by providing easily configurable reports.

WHAT ARE THE BENEFITS?

Agencies see improved ISO ratings as Fire Records delivers thorough and accurate reports designed to highlight relevant rating criteria. With accurate and efficient tracking of incident data, training efforts, water supply capabilities and equipment maintenance, agencies can produce reports which satisfies many NFIRS, ISO and NFPA requirements which can result in the community benefiting from lower insurance premiums.

INCIDENT

Ensure your report contains consistent and accurate data as pertinent details are carried forward from CAD to ensure you NFIRS and NFPA reports are accurate.

HYDRANTS

Create the best tactical response to fire by always having your hydrant locations and flowrates at your fingertips.

ROSTER

Improve firefighter safety by tracking station and unit assignments while on-duty thus ensuring accurate accountability of personnel movements and best use of resources.

TRAINING

Track attendance and course content to confirm your personnel are up to date on the latest safety and techniques for mitigating emergencies which improves your ISO scoring.

PROPERTY

Accurately document premise hazards, occupancy types and utility locations to help your responders create the safest incident action plan before they arrive on-scene.

ASSET MANAGEMENT

Document equipment locations, assignments and testing results of your critical equipment to meet ISO and NFPA requirements. Easily trend usage and create replacement schedules to improve responder safety and better manage budget funds.
