

Connected Government. Connected Citizens.

Our Municipal Management Software includes functionality for many municipal departments and processes.

Who is SDL?

Spatial Data Logic's municipal management software bridges the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

See why municipalities trust SDL:

Local & Experienced

- Headquartered in New Jersey
- 20+ years of municipal experience
- 180+ government agencies served

Visibility

- Department modules work together
- Staff can search for information and collaborate across departments
- Reporting provides a municipal-wide view of activities and concerns

All-Inclusive

- Solutions for desktop, tablet and mobile devices
- Functionality for most municipal departments and processes
- Resident & municipal solution

Empower Residents

- Multiple platforms for residents
- Residents can submit requests and search for information online
- Reduce foot traffic, data entry errors and phone calls

Work Remotely

- Keep critical processes in motion with remote access and online payments
- Mobile and remote inspections
- Online access and services for residents

Unmatched Customer Service

- Ongoing training services available
- In-house support team
- Software supports automatic updates

GIS-Based Software

- Dynamic municipal maps
- Overlay data layers for quick navigation
- Staff can map assets and also link documents to parcels

What's Included?

SDL is a comprehensive municipal management solution. As part of the SDL Enterprise License you will get:

- 1 Functionality for many municipal departments, processes and workflows
- 2 Solutions for your desktop, tablet and mobile devices
- 3 Platforms where residents can engage directly with their municipality
- 4 Municipal website that syncs with the other SDL Platforms

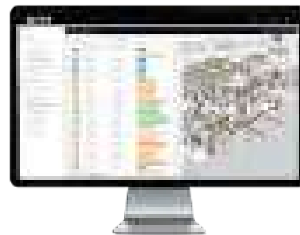

SDL Platforms

All platforms sync in real-time to provide one interconnected solution.

SDL | DESKTOP

Powerful desktop application for municipal staff to streamline daily workflows

SDL | ONLINE

Cloud-based solution that helps staff work efficiently from a web browser

SDL | MOBILE

Our mobile app helps staff access information and complete tasks in the field

SDL | PORTAL

Web-based tool where residents can submit requests and access public data 24/7

SDL | CITIZEN

Free app that residents can use to search for information and submit requests

SDL | SITES

Municipal website with SDL Portal integration for a seamless web experience

Included Modules & Functionality

Our software modules span across many municipal departments, processes and functions. The modules work together to provide a comprehensive view of property history by department and parcel.

Construction

- Permits (UCC & Non-UCC)
- Review and manage plans
- Track inspections and certificates
- Issue violations
- Produce DCA reports
- Elevator inspections and invoicing

Land Use

- Manage dates, conditions, performance guarantees, inspections, violations and zoning officer permits
- Track applications, fees and escrow, block grants and open space

Engineering

- Road openings, grading and cleaning permits
- Map extents, line and area measurements
- Track inspections

Tax Assessor

- Maintain change of ownership list
- Track construction permits

Fire Prevention

- Manage fire permits and LEA reports
- Inspections (LHU & Non-LHU)
- Smoke/CO detector inspections and violations
- Pre-plan information

Code Enforcement

- Enforce property maintenance code
- Housing inspections & violations
- Manage landlord and tenant information
- Register vacant, abandoned and foreclosed properties

Health

- Inspections (local and multi-town)
- License food, bathing, well and septic systems
- Issue violations and develop risk-based inspection reports

Police

- Register alarm systems
- Access parcel data from other departments (owners, tenants, pets, complaints, etc...)

Clerk/Licensing

- OPRA and complaints
- Licensing and renewals (liquor, taxi & tow, mercantile)
- Track board meetings, games of chance and parking permits

Pet Licensing

- Issue and renew pet licenses
- Track rabies certificates
- Manage dog bite incidents and dangerous pets
- Report to the state

Manager

- Track all complaints by department
- Develop and maintain reports

Public Works

- Manage work orders, inspections and assets
- Track manpower, equipment and materials
- Fleet management
- Storm water functionality (debris removal, outfall/inlet inspections, asset repair)

Utilities

- Water and sewer functionality
- Manage assets and service requests
- Conduct inspections and testing
- Manage accounts and meter change-outs

What's New?

Online Plan Review

- Offers a structured workflow to submit, review and approve plans digitally
- Plans are preprocessed for fast load times and easy navigation
- Change detection flags changes between versions
- Add mark ups, assign tasks and view progress

Remote Inspections

- Fully integrated and friction-free way to complete secure video inspections from a web-browser
- Inspector has full control over the process
- Access plans, checklists & statutes
- Time-stamped log of all photos and notes
- Keep your staff and communities safe

SDL Sites (Municipal Websites)

- Our sites provide the online experience & services your residents have come to expect
- SDL Portal feeds into SDL Sites so residents can search for information, submit requests and see personalized information on their town's website
- All actions sync back with the other SDL platforms to streamline municipal workflow

Let SDL Get Your Town Online

Remote Access

SDL streamlines, automates and digitizes workflows resulting in increased productivity and access to information from any location. SDL Hosting eliminates the need for local servers and is perfect for municipalities who want remote access, do not want to maintain in-house servers or are concerned with cyber threats.

Online Services

Our software includes 3 resident-facing platforms: SDL Portal, SDL Sites and SDL Citizen. These platforms bring your town online, allowing residents to access property information, submit requests and check the status of those requests from home. Your town retains full control over which departments, features and information are made available to the public.

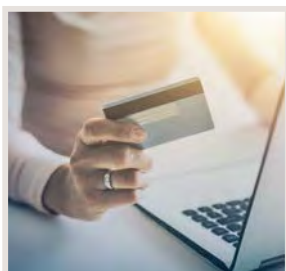

Mobile & Remote Inspections

Access property information, document worksite and complete inspections in the field using SDL Mobile. Or, with SDL's Remote Inspection Feature, inspectors can invite contractors to complete secure video inspections from home. Inspectors have full control including verbal & visual directives, photo capabilities, note-taking and access to building plans & statutes.

Plan Reviews

Our Simple Plan Viewer provides a streamlined way to request, review and share digital plans, while our Online Plan Review provides a full end-to-end solution. With Online Plan Review, users will benefit from the structured workflow, fast load times, change detection feature, and the ability to review and add markups simultaneously.

Online Payments

Enabling online payments will help your municipality maintain a healthy cash flow. Spatial Data Logic integrates with MuniPAY to offer both online and counter payments.

Municipal Websites

SDL's website solutions deliver the online services, access and functionality your residents have come to expect. By integrating with the SDL Portal, the public can search for property information, submit online requests and take other actions directly from their town's website.

WHAT OUR CLIENTS SAY

"SDL has not only cut down on foot traffic, phone calls, and OPRA requests, but has also strengthened the Township's relationship with our community."

- Clerk's Office, Tom's River Township

"As the saying goes 'Work Smarter, Not Harder' this is what SDL has done for us. As we use technology to streamline processes and eliminate duplication of efforts our move to SDL was necessary."

-Code Enforcement, Bernards Township

"SDL has greatly improved our fire inspection efficiency. It enables us to see building pre-plans, last date service was performed on fire systems, write violations and update emergency contacts all while in the field."

-Fire Inspector, Marlboro Township

SDL Sites: "We are enjoying the fresh new and updated look and feel of our site...The seamless integration with the SDL Portal for submission of forms online is a major improvement for users."

- Website Developer, Ewing Township

"SDL mobile app is a very valuable tool....it enables the inspectors to record results and list conditions immediately and the office has the information right away. That is a big time saver for both the people in the field and the staff in the office."

-Construction Official, Millburn Township
