

# FROM DIAGNOSIS TO ORTHOSIS- ALL IN YOUR OFFICE.

The P-POD™ is a foam-in-place cranial orthosis designed to apply static or gentle pressure to an infant's head to improve the head shape. The foam insert is custom-molded to the baby's head through a simple process that can be done in less than 30 minutes.

## FEATURES AND BENEFITS

- Helmet molding happens at point of care—no visits to specialists or extra appointments necessary
- Optimum helmet fit and alignment without scanning
- Non-irritating, biocompatible foam avoids creating pressure points
- Requires less adjustment than standard helmets

**HCPCS Code: S1040**

# HOW IT WORKS:

1

Use putty to fill in the flattened areas on the baby's head

2

Place P-POD helmet on baby, securing straps

3

Mix the foaming solution in its packet

4

Attach the foam pouch to the bladder inside the helmet

5

Roll up pouch to fill helmet bladder with foam solution

6

After the foam sets, trim the foam and your P-POD is ready
