SIMPLIFYING GIS THROUGH INNOVATION

WHO WE ARE

Civil Solutions, a division of ARH Associates, is a leading geospatial technology firm focused on providing our clients with business solutions through consultation, collaboration, and teamwork.

Our technology experts follow the best management practices for data management and technology solutions, and our project team includes our clients throughout the various phases of a project. We draw from our diverse expertise of team members in order to help our clients achieve their business goals.

SOLUTIONS & SERVICES

Enterprise GIS Services & Tax Mapping

Civil Solutions designs geospatial technology for sustained growth and offers business needs throughout the business life cycle. Our consultants have experience and proven capability to perform in all aspects of implementation and operational support.

Our services include cloud hosting, data conversion, data development and management, digital tax mapping, and GIS implementation and design services.

Solutions Highlight

COVID-19 Daily Work Clearance App
The COVID-19 Daily Work Clearance App is a remote COVID-19 screening application for the daily monitoring of the wellness of an organization's employees.

ArcGIS Online Solution Package
Civil Solutions' ArcGIS Online Solution Package provides a foundation of maps and applications that can be integrated into an organization's current business workflows.

Software Development

Civil Solutions' application development expertise allows us to identify and fill the gaps between data and insight, which translate into ideas and results, thus transforming needs into solutions.
