ISUZU

The Biggest Advancement in PTO Underdeck Systems in 50 Years!

The industry demanded higher dependability, greater durability, and lower life cycle cost. And we responded.

Shown with ThermalGuard™ Weather Protection Kit and tank mounted FailSafe™ Dual Sensor Redundancy System.

In 1972, Vanair® developed the world's first vehicle-mounted, PTO driven rotary screw air compressors, establishing the industry and meeting the demand for better mobile workplace productivity. We've built on our tradition of listening to our customers with the new PTO Underdeck Technology. The unprecedented innovations we've engineered into our systems answer your demand for improved reliability, increased uptime, and reduced life cycle cost. Available exclusively on Vanair®.

Advanced and Streamlined Separation Tank with Integrated Manifolds

- Replaces outdated designs with built-in thermal valve, temperature thermistor, pressure relief valve, single and dual pressure regulators, oil filter assembly, and Ultrasonic oil level sensor option
- Integrates the components and manifold into the tank for faster installation plus more dependable and efficient performance with less maintenance
- JIC and O-Ring fittings for connecting points reduce leak points by over 60%
- Sensors can be remotely mounted in a weatherproof enclosure for protection from the environment
- Assured anti-static grounding system

UltraLife™

6000 Hour Air/Oil Separator Element

- Innovative design offers the lowest cost of ownership in the industry
- 6 times more life than the nearest competitor's spin-on coalescer element
- 15 times more life than an underhood design means the coalescer will last longer than the life cycle of your vehicle
- Assured anti-static grounding system

V-TEC II

Vanair Total Electronic Control

The newly designed V-TEC® II Control System provides clear, informative, and intuitive operation, as it automatically controls all the new features. Other advantages include:

- Infinitely variable to reduce fuel, noise, and wear and tear on the engine
- Reliable harnesses and simplified wiring
- All harnesses are designed and tested in accordance with IPC/WHMA-A-620C standard
- Utilizes Deutsch waterproof connectors for ALL connections
- Easy plug and play for faster installs and straightforward diagnostics
- Unique Torque Management for a soft, smooth engagement of the PTO, protecting the system and driveline
- Onboard diagnostics and prescribed maintenance intervals
- USB updatable and rugged IP67 rated weatherproof display with low-light and bright light viewability
- No third-party programming required

The New Brushless Fan Compressor Oil Cooler Package with Thermal Protection

- Industry-leading 40,000 hour design life
- Certified IP68 weatherproof brushless fan with built-in thermal protection eliminates the need for fan relays

Sullair® Air End

The Sullair® Air End is manufactured in the USA and recognized throughout the world as the most durable rotary screw air compressor on the market. In addition to its unmatched dependability and lifetime warranty, our air end offers:

- 110,000 hour design life
- Lowest input speeds on the market. Lowest input speed = lowest engine RPM.
- Over 18 standard gear ratios available for greater efficiency for lower horsepower requirements and noise reduction
- 100% duty cycle
- Integrated inlet control valve

Optional Features

FailSafe™ PATENT PENDING Dual Sensor Redundancy System

- Patent-Pending FailSafe™ Dual Sensor Redundancy option provides backup in case critical sensors fail
- Virtually eliminates downtime for increased uptime

ThermalGuard™ PATENT PENDING Weather Protection Kit

- Patent-Pending ThermalGuard™ uses the vehicle's warm engine coolant to preheat the compressor oil and regulators to prevent oil-starvation and freeze-ups during cold conditions
- Aids in the elimination of moisture
- Arrives at the worksite without thick, cold oil or frozen regulators to compromise the compressor operation
- No moving parts or problematic electrical connections

Ultrasonic Oil Level Sensor PATENT PENDING

- Increased reliability readings over other types of oil sensor technology
- No moving parts
- Fully protected in a stainless steel encased sensor housing

10 Year Comparative Prescribed Maintenance Life Cycle Costs

It All Adds up to Vanair® Keeping You Out of the Red

Prescribed Maintenance Oil

Price per gallon	\$70.00
Gallons per oil change	x 3.50
Cost per oil change	\$245.00
# of oil changes/10 yr vehicle life	x 10

Total oil change cost **\$2450**

Nearest Competitor

Price per gallon	\$86.66
Gallons per oil change	x 4.75
Cost per oil change	\$411.64
# of oil changes/10 yr vehicle life	x 20

Generates 65 more gallons of waste oil than Vanair®

Total oil change cost **\$8232.70**

Vanair® saves you **\$5782.70** in oil costs per vehicle over 10 years

Prescribed Maintenance Coalescer

# of filter changes/10 yr vehicle life	x 0
--	-----

Total coalescer cost **\$0**

Nearest Competitor

Coalescer filter price	\$182.77
# of filter changes/10 yr vehicle life	x 10
Total coalescer	\$1827.70

Total coalescer cost **\$1827.70**

Vanair® saves you **\$1827.70** in coalescer costs per vehicle over 10 years

The Prescribed Maintenance Savings Add Up!

\$7610.40
1 vehicle/10 years

\$76,104
10 vehicle/10 years

\$152,280
20 vehicle/10 years

Based on each manufacturer's recommended rotary screw oil and coalescer change schedule and assumes 500 hours compressor use per year.

Complete Underdeck Kits

Each Vanair underdeck kit is specific to the make and model of your vehicle. All kits for trucks contain the following items plus the power unit, such as an air compressor or generator that you select.

- Power unit
- Advanced manifold with UltraLife™ 6000 hour coalescer
- New brushless fan compressor oil cooler package with thermal protection
- Air filter assembly
- Redesigned V-TEC™ II display and compressor control system
- Vanguard rotary screw compressor oil
- Hosing
- Valving

All Kits Contain (except Xcite generators)

+ Power Units

+ Optional Features

FaiSafe
Dual Sensor Redundancy System

Remote Mount
Sensors

ThermalGuard
Weather Protection Kit

Ultrasonic Oil Level Sensor

Why PTO?

Half the price of a tow-behind | Extra bed space
Increased maneuverability | Tier 4F Compliant
Less maintenance | Freed up hitch | Reduced weight

Utilizing the vehicles own engine for power, Vanair underdeck rotary screw compressor systems provide you with the exceptional power your crew needs to get the job done where and when they need it. Using a single PTO opening and mounted seamlessly out of sight, under the vehicle, these systems provide up to 300 CFM* of impressive air power, AC power or hydraulics, or any combination of all three.

Additional Options/Accessories

FILTER LUBRICATOR REGULATOR (FLR)

Controls pressure and adds lubricant to the compressed air system.

MOISTURE SEPARATOR

A filter to remove harmful oil/water condensate, pipe scale, dirt and rust from your compressed air system.

AIRLINE DE-ICER

Durable dispensing unit to help prevent airlines from freezing.

AFTERCOOLER WITH BRACKET

Heat exchanger for cooling the discharge from an air compressor. Removes moisture captured in the compressed air.

TOOL LUBRICATOR

Device to lubricate the air tool assembly.

HOSE REEL WITH HOSE

Retractable, spring-loaded steel hose reel with hose, rated for maximum compressor output.
