LeaRRn

LEARNING HEALTH SYSTEMS REHABILITATION RESEARCH NETWORK

Collaboration to improve rehabilitation quality, value and outcomes

What is a Learning Health System (LHS)?

A LHS systematically integrates evidence established with internal data and real- world experience in order to provide high quality, safer, more efficient care.

Identify Stakeholder Priorities

LHS Innovation Hub Partners

LHS Scholars and Pilot Awardees

Plan & Conduct Research & Evaluation

Implement Change & Reassess

Disseminate & Translate Results

Who Are LHS Researchers?

Individuals embedded within a health system that collaborate with its stakeholders to produce novel insights and evidence that can be rapidly implemented to improve the outcomes of individuals and populations and health system performance.

What is LeaRRn?

LeaRRn is an NIH-funded rehabilitation research resource center that provides support for implementation science and learning health systems research to improve rehabilitation quality, value, and outcomes.

Research Studies

Resources, training, consultation

Learning Health System Collaboration

Quality, outcomes, value, and future funding

Dissemination and translation

Funding Opportunities

LHS Scholar Program
Pairs rehabilitation researchers with health systems.

Pilot Studies Program
Funding for small research projects.

Techniques Development

Surveying to Assess:
- Needs and interest of research community
- Knowledge gaps and priority areas to target LeaRRn's impact

Customizing Resources to:
- The rehabilitation research community
- The priorities of LHS Innovation Hub Stakeholders.

Didactic Activities

Providing resources and consultation to key stakeholders:

Web-Based Learning Opportunities
- Content-Specific Webinars
- Grand Round Webinars
- Use Case Examples

Professional Development Opportunities
- Annual LHS Research Institute
- LHS Intensive Workshop
- Stakeholder Summit
- Symposia at Professional Meetings
