

Bringing Balance
to Life

REHAB'S #1 MULTIDISCIPLINARY THERAPY SOLUTION JUST GOT EVEN BETTER.

BITS Balance features a range of enhancements that allow you to challenge, assess and track patient balance. BITS Balance offers over 40 **NEW** programs focusing on patients' vision, cognition, balance and motor control. BITS Programs are optimized for OT, PT and SLP, making BITS a robust, multidisciplinary tool that provides value for everyone.

PATIENT ENGAGEMENT

Motivate patients to progress with stimulating therapy exercises.

CLINICAL UTILITY

Provide more training options with over 60 programs in a single system.

CLINICIAN EFFICIENCY

Accomplish more with a single session and demonstrate outcomes over time.

CLINICAL FOCUS

Help patients combine balance with cognitive tasks to challenge both static and dynamic balance control.

VISION	Visual Acuity, Pursuit of targets, Scanning Environments
COGNITIVE	Working Memory, Sequencing Tasks, Executive Functioning
MOTOR	Endurance, Weight Shift, Upper Extremity Coordination
BALANCE	Dual Tasking, Postural Stability, Standing and Seated Balance

VERSATILE BALANCE TRACKING

Track patient's movements during balance exercises using a body worn motion sensor or balance platform that detects posterior, anterior and lateral movements. Personalize and configure balance training sessions for patients at every level of mobility throughout their rehabilitation.

THERAPY CATEGORIES

Engage and motivate your patients with dual task programs.

Static Balance:

Challenge posture and orientation during cognitive and visuomotor activity

Dynamic Balance:

Combine cognitive processing and balance control

Optokinetic Stimulation:

Incorporate visual distortion to challenge eye movements

Vestibular Training:

Assess gaze stabilization with exercises that involves eye and head movements

Balance Assessments:

Make tracking outcomes easier with standard digitized assessments
