

Simplify Patient Check-in & Access Pre-visit Patient Questionnaire Data Online

CHADIS and GetDoctor Integrated lets your patients complete questionnaires from the comfort of their home and then provides a zero-contact check-in system within a simple app. In just a few minutes, your office can eliminate the waiting room and streamline patient flow.

Address your patients' concern of exposure risk by allowing them to:

Complete medical/behavioral questionnaires pre-visit. Scores are available for providers in realtime.

Wait safely in their car.

Complete COVID-19 screening questions.

Get an alert to enter when your staff is ready.

The most complete web-based patient data collection system for comprehensive health and mental health care for all ages. It automatically assigns, requests, collects, scores, interprets, and graphs patient questionnaire data.

Provider can assign from
100's of available questionnaires

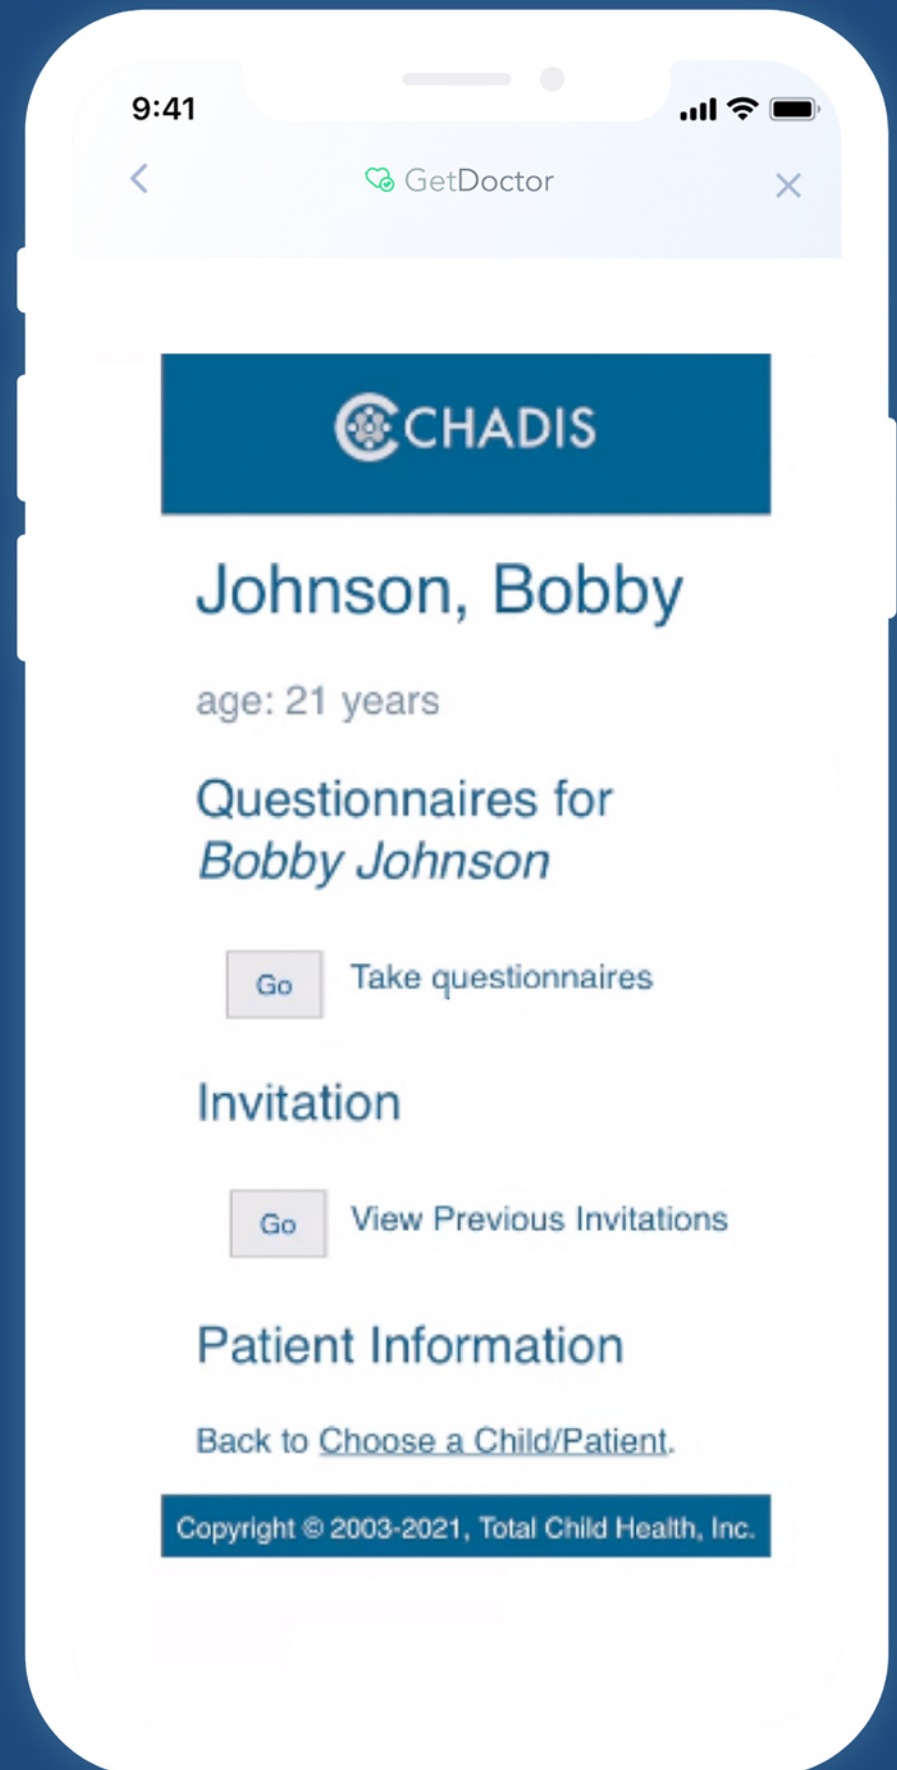

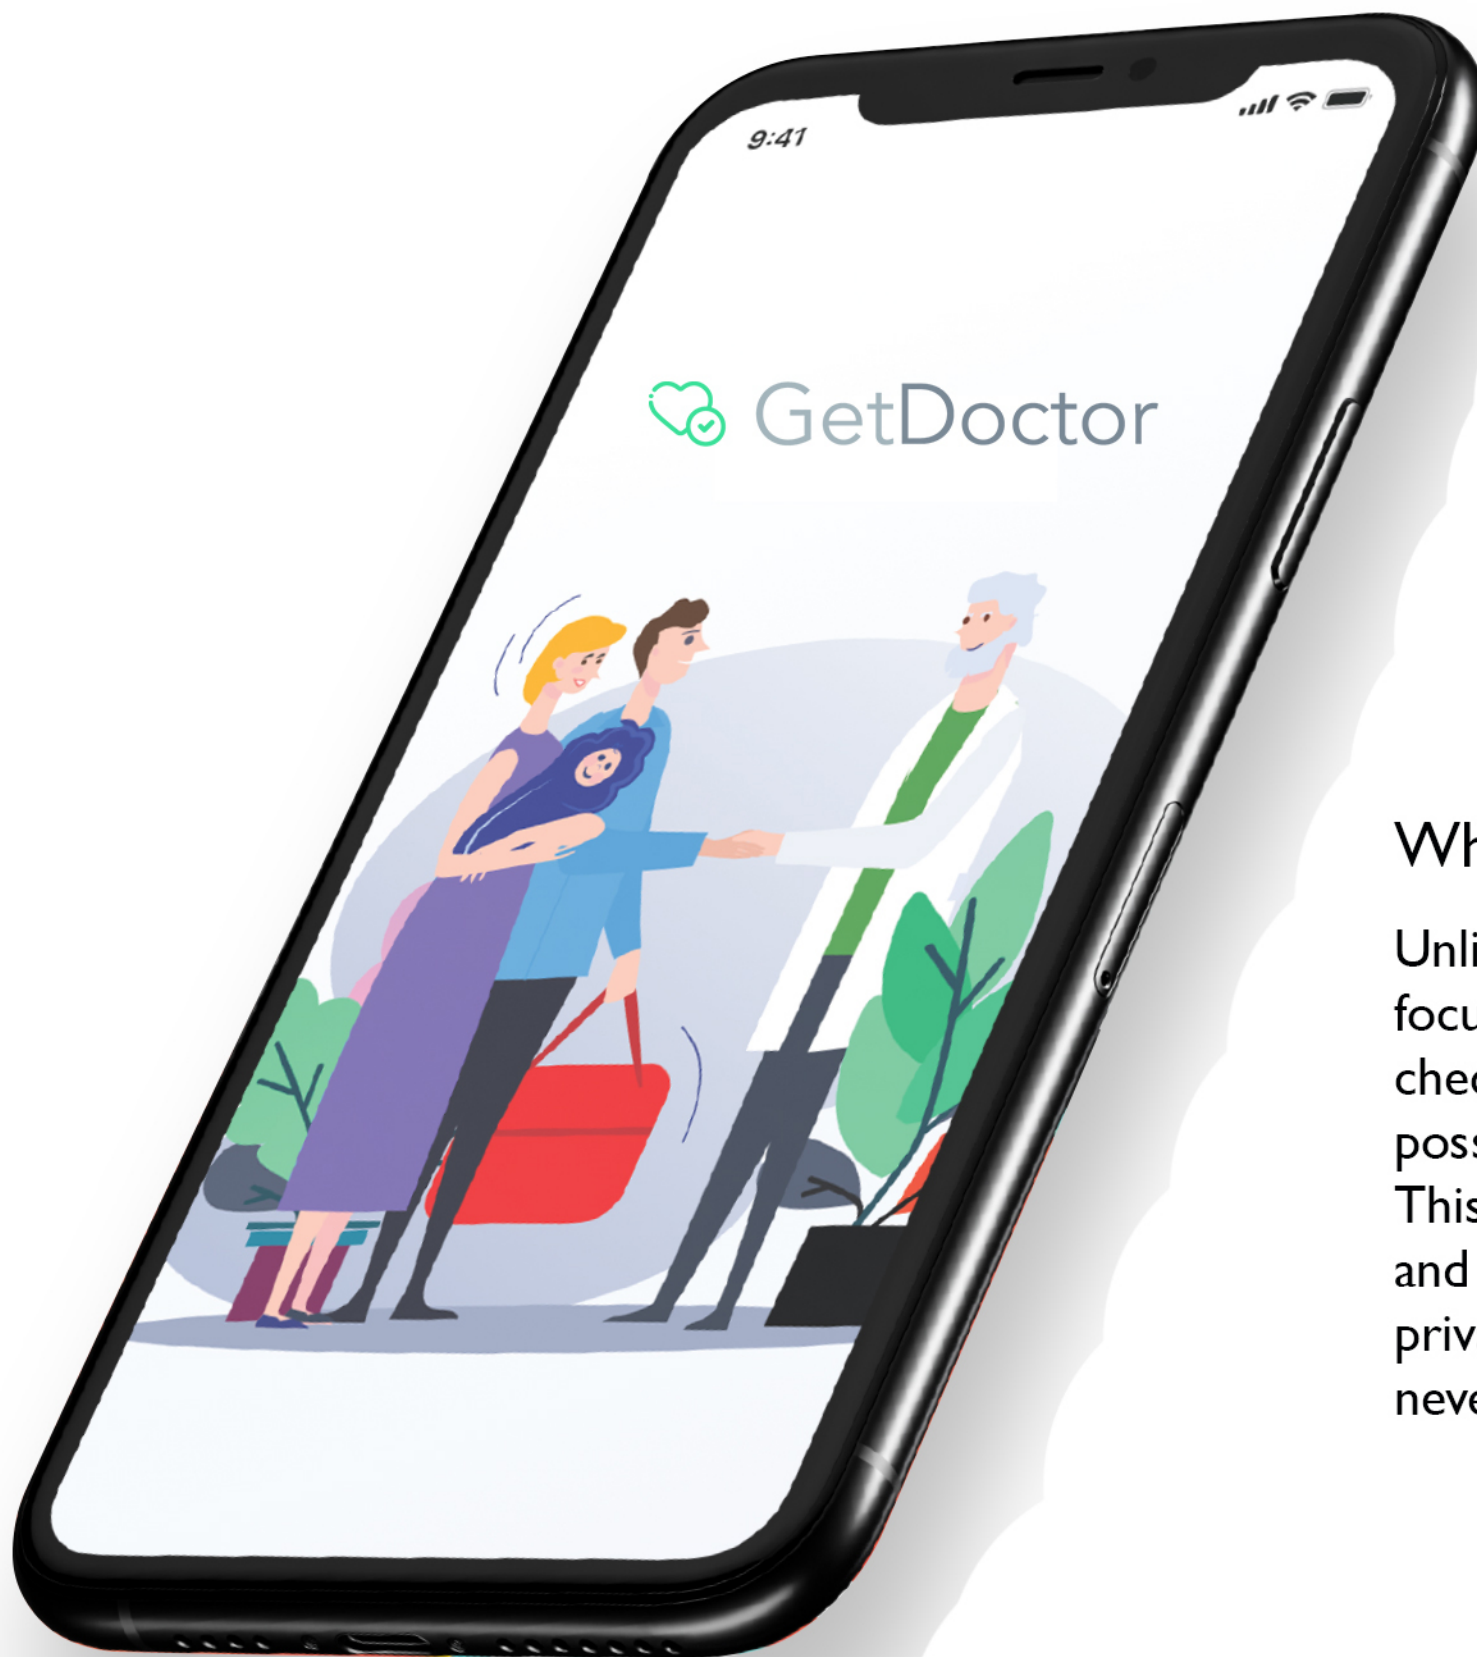

Automatically requests
questionnaire completion via
SMS or email.

Collects and scores data
in realtime.

Interprets and graphs data
for your review.

What Makes GetDoctor Different?

Unlike other healthcare apps, GetDoctor focuses exclusively on streamlining the check-in process and creating the best possible patient experience during intake. This keeps our app lightweight, intuitive and secure. We take our commitment to privacy and security seriously and will never sell or compromise your patient data.
