

SECURE EMAIL AND FORMS

Protect Your Patients' Private Health Information

These features bring security and peace of mind to your online presence. With them, you'll be able to protect your patients' private health information, stay HIPAA compliant, and prevent security breaches.

- Take steps to stay HIPAA compliant
- Encrypt your emails
- Make website forms secure

Benefits of Secure Email and Forms:

Have peace of mind knowing that all information sent to and from your office is within HIPAA guidelines and is safe and secure.

Email encryption can help you comply with your industry's regulations, and reduce the risk of a potential data breach.

Emails, documents, and forms sent and received by your secure email address will protect the information inside, even if the other person doesn't have a secure email address.

Special coding makes the patient forms on your website secure, preventing data breaches.

DID YOU KNOW?

\$6.2B¹

annual estimated cost of
US healthcare industry
data breaches.

\$2.6M+²

amount broken
appointments are reduced
with confirmation calls.

What Else Comes with Secure Email and Forms?

- Easy-to-use email application
- An iPhone app for secure communication on the go
- Each email address includes 10GB of storage
- Receive a Business Associate Agreement – a contract that protects private health information in accordance with HIPAA guidelines
