True Practice Connectivity & Flexibility

The ultimate platform for single and multi-location practices, your entire team can leverage the power of DSN from any location and any time. Streamline your workflow with unlimited cloud storage, seamless compatibility, advanced imaging features, and easy file sharing.

Access to the Best Technology

Our cloud-based software updates automatically, so you are always benefiting from the latest platform enhancements every time you log in. With industry-leading uptime, your practice will always be running at the highest level of performance. Streamline your workflow and increase your savings by keeping all of your services in DSN Cloud.

Complete Data Protection & HIPAA Compliance

We keep patient and financial information secure and have partnered with the industry leader in cybersecurity to ensure your data is safe. We perform continuous backup protection, security audits, and third-party intrusion detection.

Optimized Onboarding & Management

Transitioning to the Cloud is easy when you work with the highest-rated customer care team in the industry. Throughout our smooth setup process, you enjoy top-level customer support and training from our reliable team of experts.

DSN Cloud Imaging Get the Picture—Anywhere

Free yourself from the limitations of traditional hosted or closed-architecture imaging software. Easily view and share images anytime, anywhere—without data caps.

- Load and share images including CBCT in seconds, 24/7 from anywhere in the world
- Real-time CBCT imaging manipulation including 3D rendering
- Share images quickly and easily via encrypted email or secure login for referring doctors with complete cloud 3D enhancement capabilities
- Eliminate physical discs and multiple imaging programs to streamline your workflow
- Reduce your IT expenses and difficulty associated with on-site servers
- Integrated with the widest range of imaging brands in the industry

Practice Success, *Elevated*

DSN Cloud allows you to focus on the work you do best: creating outstanding patient experiences and outcomes. Ideal for practices of any size, from single-location surgeons to large groups with multiple locations.

Our powerful practice management features are now available in one seamless solution customizable to your workflow:

Complete Electronic Medical Records—Create and store patient records with ease. Generate letters and clinical notes instantly from unlimited customizable EMR templates. The clinical notes include comprehensive anesthesia and IV medication records and integrate with the largest selection of vitals monitors in the market. Within DSN's EMR module, view all historical patient records, letters, images, and identify potential drug interactions with full Lexicomp integration.

Advanced Implant Inventory & Management—Quickly scan implants in and out of inventory. Link them to the patient record for seamless treatment planning from top to bottom.

Detailed Referral Tracking & Reporting—Referral tracking and analyses produce more efficient collaboration between offices. Leverage powerful data to maximize your referral base and provide seamless treatment between offices.

Simplified Scheduling—From easy-to-use templates to customizable quick views and more, tracking your production scheduling has never been easier!

Full Scope E-Services—Take advantage of our entire suite of E-Services, including E-Reminders, E-Claims, E-Statements, E-Prescriptions, email encryption, online patient registration, and more.
