P series

Strike a chord with
precision and productivity.

straumanngroup
Digital Solutions

“Give your patients and clients what they need and expect in this digital age: faster, easier and more flexible care.”

HIGH QUALITY

Trust in reproducible
results and premium quality
from Straumann®

Performance that makes a lasting impression.

P series delivers a new dimension in fast and professional 3D printing to allow you to produce top-quality dental products in-house and on-demand. P series 3D printers provide new functions to improve quality, flexibility, productivity and efficiency.

P series delivers consistent, high-quality products you can rely on, with Straumann service and after-sales support. Flexible enough to meet the demand for ease-of use in clinical practice and high productivity in dental laboratories. Suitable for a wide variety of released and planned indications and applications: models, splints, gingiva masks, temporary crowns and bridges, drill guides, casts, denture bases, impression trays.

P series allows dental labs to increase productivity and enhance their customer service offering. Dental practices can increase their profitability by gaining control of the full workflow from planning to production and finishing. Easy-to use, plug-and play features allow both dental labs and practices to improve overall efficiency and shorten patient treatment waiting time.

FLEXIBILITY

Full control and the ability to adapt the production process to meet individual needs.

PRODUCTIVITY

Increase productivity and profitability from planning to production and finishing.

EFFICIENCY

Improve efficiency of your workflow and shorten turnaround times.

CARES® P series 3D printers.

Tailored to meet the demands of dental laboratories and clinical practices.

P series is a new generation of precision 3D printers from Straumann Group Digital Solutions for fast and professional in-house production of premium-quality dental products. Offering integration with our CARES® and coDiagnostiX® workflows. Robust, reliable and flexible the P series provides a new experience in professional dental printing in terms of speed, precision and open solutions. Gain access to a complete solution from printing to washing and curing.

P10+

Ideal for Clinical Settings

- Easy-to-use 3D printer specifically designed for dental practices
- Plug-and-play features ensure ease-of-use for the dental practice team
- Compact, professional 3D printer
- Single-use consumables reduce storage requirements and simplify daily maintenance and handling
- No specialist knowledge required in 3D printing

P series printers are wi-fi enabled for remote troubleshooting.

Straumann Group Digital Services

Straumann® P series are open 3D printers with integration with CARES® Visual, CARES® Visual Chairside and coDiagnostiX® as well as a selection of 3Shape products.

Straumann® P pro resins

A range of available and planned resins:

Master model – Aligner model –
Gingiva mask – Cast – Indirect
bonding tray – Tray – Surgical
guide – Bite splint – Try in –
Denture base – Crown & bridge
temporary restorations

P30+ & P30+ ASM 2.0

Fast, flexible and semi-automated 3D printing for dental labs

- For high productivity
- With high efficiency, reproducibility, precision and quality
- Temperature controlled resin reservoir for process stability and improved print-speeds
- Automated Continuous printing w/ P30+ ASM 2.0

P40

Professional solution for high-volume 3D dental printing

- For high-volume production
- With maximum efficiency, reproducibility, precision and high quality
- Temperature controlled resin reservoir for process stability and improved print-speeds

P20+ (not illustrated)

The professional 3D printer entry-level system for dental labs

- For dental labs who want to start using 3D printing technology
- Peace of mind with reproducible precision and high quality
- Easy-to-use, plug-and-play features

Straumann P pro Materials

US

CA

Wash and cure. Easy and efficient.

P wash

Increase efficiency by automating the wash cycle.

- Fully automatic cleaning in approx. 10 minutes
- Reduced contact with sticky resins and cleaning liquids
- Stackable with P cure
- Computer-controlled programs help with effective use of cleaning liquids

P wash and P cure are wi-fi enabled for remote troubleshooting.

A new dimension in connectivity.

Because we care about the whole workflow from start to finish, Straumann Group Digital Solutions connects carefully selected dental equipment with the latest digital technology and premium materials to provide an efficient, open and integrated digital workflow for dental professionals.

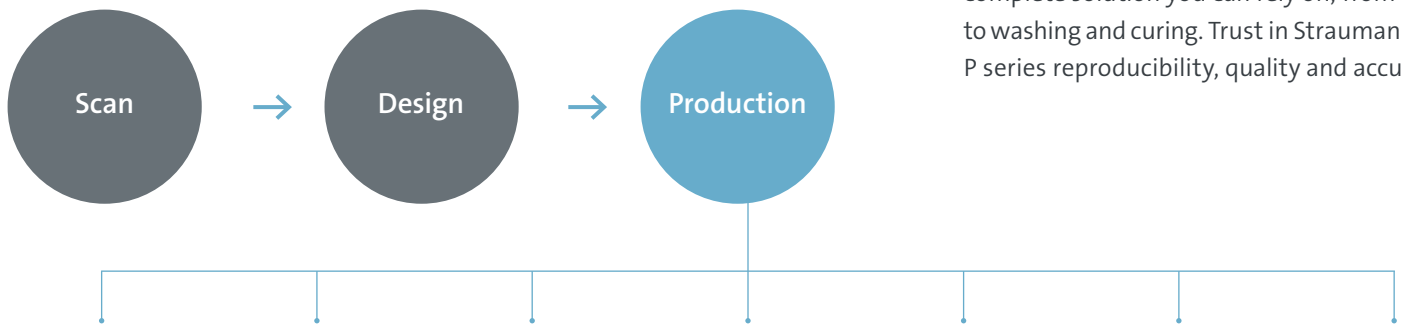

P cure

Automated curing and finishing solution for maximum performance.

- Temperature control
- Precise wavelength of light emission from integrated light source
- Protective gas supply not required

WORKFLOW

Our digital workflow allows the combination of individual components to work together to deliver high-quality performance. Giving you access to a complete solution you can rely on, from printing to washing and curing. Trust in Straumann Group P series reproducibility, quality and accuracy.
