

Track your implant inventory, placement and usage with ease

From implants, medications, certification and reports, Sowingo allows you to track and manage all of your dental and surgical inventory supply needs with one easy-to-use platform.

Start your free 14-day trial at:

www.sowingo.com

We supply the tools so you can focus on running your practice.

Our easy-to-use software has been meticulously designed alongside dentist and dental teams to ensure your office is equipped with everything necessary to run a successful practice.

Complete visibility

Real-time reporting keeps spending and supply availability up-to-date and accessible from anywhere.

Manage supply budgets

Keep track of supply spending to meet budgeting targets and goals through our platform.

Implant tracking

Track all implants, cover screws, bone grafts, healing abutments, membranes, and receive detailed placement reports.

Never run out of supplies

Set alerts for when products are about to expire or run low, to never be caught off guard.

Track all medications

Monitor all general and emergency medications, set low stock and expiry alerts.

Scan products in & out

With our dedicated iOS app, easily keep track of inventory by scanning products in and out.
