

Stability at your fingertips

Neoss ProActive[®] Edge

Neoss ProActive[®] Edge gives you the power of uncompromised stability and simplicity every time

Intelligent Simplicity

Neoss ProActive® Edge is the latest evolutionary step in the Neoss implant range. It combines outstanding initial stability with a uniquely simplified drilling protocol, ensuring that every procedure is performed with complete confidence.

The proven Neoss ProActive® surface and NeoLoc® connection in combination with the new evolutionary thread design and simplified drilling protocol ensures predictable stability in challenging clinical cases.

Treatment benefits

- Outstanding primary stability
- Simplified protocol, fewer drill steps
- Minimal bone removal
- Confidence in challenging cases

Neoss ProActive[®] Edge

Neoss ProActive[®] Edge puts performance at the forefront

Drilling made simple

The implant and thread designs are matched directly with the twist drills for ultimate ease of use – in most cases only two Neoss drills will be required to place the implant.

Place with confidence

Neoss ProActive[®] Edge is designed for outstanding primary stability; the thread and pitch profile allows for maximum bone-to-thread contact giving you immediate feedback during placement.

Restore with trust

With minimal bone removal and outstanding primary stability, this innovative solution is designed for reduced healing times and increased patient comfort.

Building on success – for you and your patient

The Neoss implant range is one of the most successful in the market today. Utilizing the patented Neoss design at its foundation; you are already a step ahead with Neoss ProActive[®] Edge.
