

Dentsply Sirona Implants

The Best Just Got Better

DS PrimeTaper™ and Osseospeed

INTRODUCING DS PRIMETAPER™

DS PrimeTaper is a demonstration of science and art in harmony. With immediate function and intuitive digital workflows, these unique implants will complement and enhance your artistry.

1

EFFICIENT HANDLING

Feels great in your fingers, and even better when you see the result.

2

LASTING BONE CARE

Immediate function gives confidence and a load off your mind.

3

ENVIABLE ESTHETICS

Patients will look great for years to come... and so will you.

4

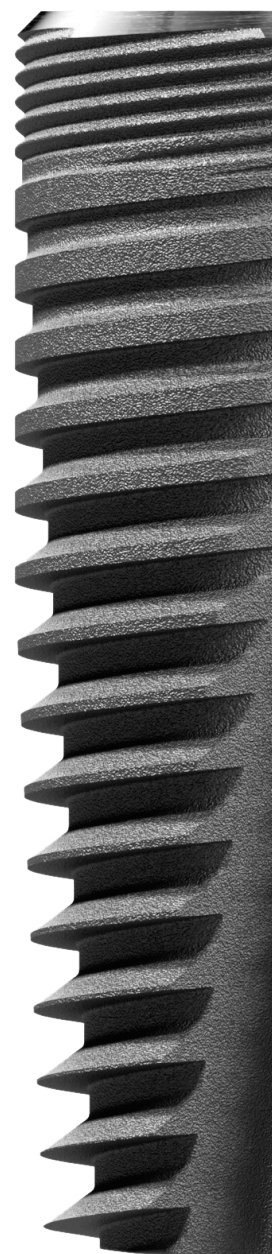

SEAMLESS WORKFLOW INTEGRATION

We've simplified the treatment process, so you can stay in the zone without interruption.

Discover Dentsply
Sirona Implants

Clinically shown to be the
#1 implant system
for marginal bone
maintenance.

Dentsply Sirona beat the competition in a new meta-analysis

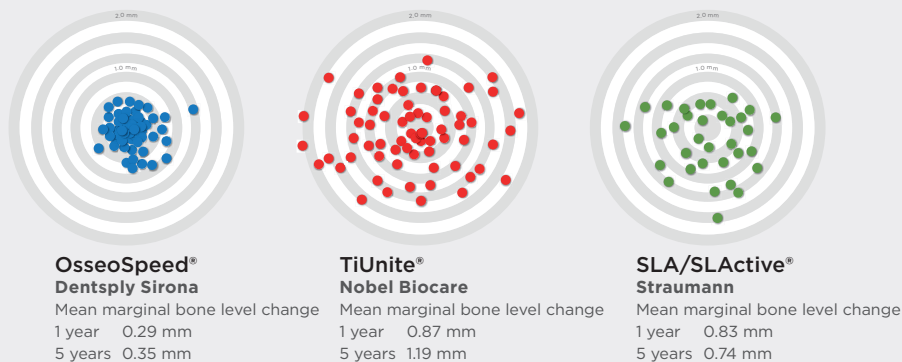

SUPERIOR MARGINAL BONE MAINTENANCE WITH OSSEOSPEED®

Newly published results with Dentsply Sirona products

The OsseoSpeed surface, a key feature of the Astra Tech Implant System, outperforms other premium surfaces in a new meta-analysis, demonstrating significantly better marginal bone maintenance.

Highest predictability with OsseoSpeed

In addition, the study clearly indicates that OsseoSpeed has higher predictability in maintenance of the marginal bone, i.e. showing less variation around the mean and less spread (as illustrated below).

Each dot represents the reported mean marginal bone level change for the individual studies included in the meta-analysis.

High predictability enables:

- ✓ Longevity
- ✓ Peace of mind
- ✓ Esthetics

ASTRA TECH IMPLANT SYSTEM AND OSSEOSPEED® BEAT THE COMPETITION IN NEW META-ANALYSIS

Newly published results with Dentsply Sirona products

11,077

implants with OsseoSpeed, TiUnite and SLA/SLActive surfaces were compared

113

publications included in the meta-analysis

A recent meta-analysis concludes there is a statistically significant difference between three premium implant surfaces. And OsseoSpeed is the outright winner, when looking at maintenance of marginal bone after one and five years
