

TVO Supports for Virtual Learning

At TVO, we invite you to explore how to incorporate these resources to enhance your students or child's at-school or at-home learning.

TVO's digital resources can complement existing learning and each is designed with Ontario educators and media experts to maximize learning, engagement, and relevance.

Our Outreach Team can also provide online sessions to demonstrate how TVO's K-12 resources can be used in your virtual classrooms today!
