Schoolhouse Products Inc is one of Canada's leading suppliers of furniture for the education, hospitality, recreation, church and library markets. Schoolhouse Products distributes furniture from leading North American manufacturers – many on an exclusive basis. With direct sales representatives in every region of the country, we can work with customers on a face-to-face basis to better meet their needs. And to top it off, we provide a level of sales services unparalleled in the industry.

The products shown in this price list represent only a small selection from the wide range of products we sell. Many of the manufacturers noted have extensive catalogues showing their complete range of products. These catalogues are available upon request.

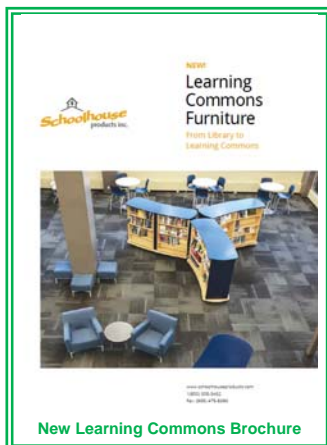

You can also find easy links to all our manufacturers' sites by visiting  
[www.schoolhouseproducts.com](http://www.schoolhouseproducts.com)

Our team of sales representatives and designers have been working with school districts, public libraries, architects and designers since the Makerspace concept originated. We have found that Makerspace means different things to different people. No two Makerspace areas are the same, and it has become clear to us that many new products are needed to create a proper Makerspace area. As Canada's major furniture supplier to the K-12 education market, we represent some of the major manufacturers of furniture and have taken the vision of our customers to these suppliers to come up with the new furniture designs for the Makerspace areas. Taken together, no company has had more experience in providing furniture for Makerspace areas, or has a wider range of unique products specifically oriented for Makerspace, STEAM and STEM areas.

Schoolhouse Products uses a unique approach to develop a Makerspace concept and translate this concept into a fully functioning Makerspace area. First, our local sales representative will meet with you at your location and discuss the preliminary ideas you may have for your space. Together, we will try to visualize the space and to answer the key questions, Who will be using the space? What type of activities will be taking place? What type of equipment/technology will be used in the space?

As the concept unfolds, our in-house designers will be brought into the planning process to create floor plans, equipment lists and budget prices and to help our customers better visualize the space, 3D drawings will ultimately be prepared at no cost to the customer. Furthermore, it becomes easy to make changes at the planning stages, changes that can best ensure that our customers will be very satisfied with the outcome. With today's drawing programs, our customers can really see what they will be getting.

So please contact one of our representatives below in your area, or contact our V.P. of Sales Sylvia Myers at the office number below or by e-mail, [sylvia@schoolhouseproducts.com](mailto:sylvia@schoolhouseproducts.com)
