Reliable Information

With the prevalence of "fake news" and non-vetted internet content, now it is more important than ever for researchers to have access to reliable scholarly, peer-reviewed information.

Our five Ultimate databases include content from the leading full-text journals in key subject areas. In addition to providing content unavailable in other resources, these databases offer unparalleled international journals that give researchers a well-rounded global perspective.
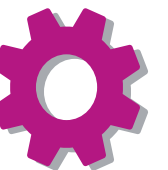

Academic Search™ Ultimate offers the most comprehensive multidisciplinary content available. Leading journals cover every research topic from astronomy to zoology and everything in between. In addition to high-quality journals, the database offers researchers access to video content from the Associated Press.

Applied Science & Technology Source™ Ultimate provides STEM students and researchers with information on a wide range of topics including artificial intelligence, applied mathematics, plastics, hydroponics, computer science, energy resources and robotics and more.

Business Source® Ultimate covers marketing, management, accounting, banking, finance and more. Content includes industry profiles, SWOT analyses, market research reports and country reports. The video collection includes 75,000 AP videos and more than 27,000 business videos from top providers including Harvard Business Publishing, Bloomberg and the Academy of Management.

Humanities Source™ Ultimate is for scholars and educators interested in all facets of the humanities from classical studies, drama, the arts, music, dance, poetry, philosophy, literature, linguistics and communication.

Sociology Source™ Ultimate is for students studying social behavior and interaction. Topics range from gender identity, marriage and family, to demographics, political sociology, religion and socio-cultural anthropology. It also includes 2,500 new sociology videos.

Collection Management

Your time — like your collection — is valuable. Maximize both with tools that streamline your workflow whether selecting databases, journals and e-books or managing library systems.
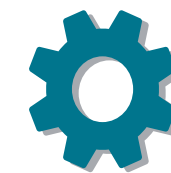

EBSCONET® Subscription Management is a complimentary tool for EBSCO customers that provides convenient online access to pricing, access options, and other important details for more than 385,000 individual titles — including 57,000+ e-journals — and more than 900 e-journal packages. As the industry's leading subscription agent, EBSCO works with more than 128,000 publishers around the globe to provide one of the world's most comprehensive journal title catalogs.

EBSCOhost® Collection Manager (ECM) allows users to order, build and manage *EBSCO eBooks™*, *EBSCO Audiobooks™* and *Flipster®* digital magazine collections from one convenient online location. The easy-to-use interface also provides access to MARC records and usage reporting.

GOBI® Library Solutions from EBSCO offers more than 17 million print books and e-books and the largest selection of DRM-free e-books to academic, research and special libraries worldwide. With more than one million DRM-free e-book options, GOBI Library Solutions is a one-stop resource for library acquisitions, collection development and technical services.

EBSCO Faculty Select™ empowers academic libraries to directly support textbook affordability efforts at their institutions. Through a single, easy-to-use interface, faculty can easily find and access quality Open Educational Resources (OER) to support their courses, and search and request access to relevant DRM-free e-books from top academic publishers. Librarians can then order requested e-books through GOBI® or through EBSCO*host® Collection Manager* (ECM).

Discovery & Technology

Advanced technology solutions ensure that students, researchers and faculty can access your library's materials easily, whether they are on campus or online.

EBSCO Discovery Service™ (EDS) is an all-inclusive search solution — including mobile — that — makes in-depth research easy. Unlock the power of your library's collection and improve the end-user experience through sophisticated features and functionality designed to anticipate user intent and to connect researchers to the most relevant scholarly information for their research, every and any time they search.

OpenAthens is an advanced access management system that eliminates the need for multiple logins. Users sign in only one time to access all their library's resources. The administrator interface is easy to use and provides granular statistics on usage to support resource and budget allocation decisions. OpenAthens is based on SAML standards to allow institutions to keep single sign-on logins and user data more secure.

Stacks is a turnkey, responsive web content platform designed specifically for libraries, enabling them to build and manage a responsive and modern library website with ease. Customizable themes, an easy-to-use administrator dashboard, key library and search integrations, rooms and events management and more, allow your library to create the best website experience possible for students and faculty — no matter the device.

Curriculum Builder enables you to bring the world of quality databases, e-books, and other digital resources from the library's discovery system easily and directly into your institution's learning management system (LMS). Build a better connection between faculty, the library and students.

Diversity of Collections

Inclusivity and diversity are key issues for academic libraries. It's important for people and groups to feel represented in the community as well as in the database information and the curated collections.

LGBTQ+ Source provides scholarly and popular LGBTQ+ publications in full text plus historically important primary sources, including monographs, magazines and newspapers.

Jewish Studies Source™ offers a multidisciplinary view of the study of Jewish civilization, from its historical origins to the present, and is one of the only databases focusing exclusively on Jewish studies.

Gender Studies Database™ includes indexing and abstracts for gender-related scholarship on gender inequality, masculinity, post-feminism and gender identity.

Women's Studies International™ is a bibliographic database for women's studies and feminist research covering sociology, history, international relations and humanities.

Arab World Research Source™: Al Masdar is ideal for students and researchers of Arabic studies, Middle Eastern studies and Islamic studies and offers information published in or pertaining to the Arab World.

African American Historical Serials Collection is an archive that documents the history of African American religious life and culture between 1829 and 1922.

Primary Sources

Primary source documents enhance research with first-person accounts of history.

Home

Archive Databases include primary source documents such as letters, diaries, maps, illustrations, correspondence and personal accounts. They help researchers develop a deeper understanding of historical issues and events, often giving them a sense of what it was like to live in a bygone era.

Archive Databases include:

African American Historical Serials Collection

Arte Público Hispanic Historical Collection: Series 1 and 2

Atla Historical Monographs Collection: 11 Series

Civil War Primary Source Documents

Gateway to North America: The People, Places and Organizations of 19th Century New York

Revolutionary War Era Orderly Books

Magazine Archives give researchers first-hand accounts from journalists covering critical historical events ranging from the moon landing to key presidential elections. Trends, fashions, and cultural signs are all represented in these snapshots of history. In addition, magazine archives save valuable shelf space and make use of one-time funds.

Magazine Archives include:

The Atlantic	*Maclean's*
Architectural Digest	*The Nation*
Art Magazine Collection	*National Review*
Businessweek	*The New Republic*
Ebony	*People*
Esquire	*Sports Illustrated*
Forbes	*Time*
Fortune	*U.S. News & World Report*
Life	*Vanity Fair*

Subject-Specific Resources

Offering collections by subject area helps students target their research and hone in on the results they need.

EBSCO eBooks™ Subject Sets save time by offering more than 60 pre-packaged collections of frontlist e-books on high-interest topics chosen by bibliographers to meet the needs of libraries, faculty and researchers.
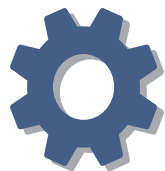

Popular subject areas include:

Arts & Humanities	Social Sciences
Business & Finance	Social & Cultural Issues
Information & Technology	Science & Technology
Medical	Vocational Education

In addition, **DRM-Free e-books** allow users to download either the full-book or unlimited chapters with no sign-in required, read them in any application and transfer them to any device. More than 280,000 DRM-Free e-books are available in multiple subject areas.

Subject Indexes enable serious researchers to conduct a thorough review of literature with speed and efficiency. EBSCO partners with top organizations across disciplines whose experts in the field curate and classify the most relevant materials for researchers. Try them on EBSCO*host*® or *EBSCO Discovery Service*™ for targeted results with links to related content in your library's collection.

Subject areas include:

Anthropology & Sociology

Education & Behavioral Sciences

Humanities

Politics, Policy & International Relations

Religion & Philosophy

Science & Technology

Skill-Building Resources

Resources help students build life skills and improve research techniques and also help enhance staff professional development.

Home

Resources for College Students:

LearningExpress Computer Skills Center™ Nearly 100 self-directed video tutorials covering the basics of computers, Windows and Mac OX operating systems, and searching the internet. The resource also includes beginner-to-advanced tutorials for some of the most commonly used software applications from Microsoft and Adobe.

PrepSTEP® for Colleges and Universities and *PrepSTEP® for Community Colleges* are dynamic online learning platforms packed with tutorials, practice tests, articles, e-books and high-stakes test preparation for self-guided skill building, career preparation and workforce readiness.

Resources for Librarians:

Flipster® digital magazines are a great way to provide students and faculty with visually appealing content that keeps them up-to-date on the latest trends in hot topic areas such as finance, politics, business and more. Plus, researchers can access digital magazine content in EBSCO*host®* and *EBSCO Discovery Service*™ search results.

Library & Information Science Source™ offers journals and periodicals that help librarians and researchers keep pace with the latest trends in a rapidly evolving field.

Research Output

SaaS Solutions for Library Management and Research Output Workflows

EBSCO works to ensure that our library services platform and additional services for storing, organizing, and preserving data interoperate with other systems to support an open future.

FOLIO is an open source library services platform that includes core library management functionality. It is built on a modern architecture to ensure continuous innovation while supporting the integration of applications from third-party providers. EBSCO FOLIO services offer support including implementation and data migration services, hosting in the EBSCO AWS infrastructure and support for the FOLIO platform.

Code Ocean Create, share, execute and publish computational code and data with Code Ocean. This platform provides tools for researchers to save time and work in one place, and it helps institutions collect and preserve outputs to understand their impact.

protocols.io Develop and organize research methods with protocols.io. It allows researchers to collaboratively create, manage and share research methods, and it helps institutions collect the research methods, understand their impact and improve their discoverability.

Perpetua is a field-proven, long-term data management solution for preserving, safeguarding and discovering an institution's valuable collections and research output. Built-in automated processes ensure future accessibility, easy search and usability of the data, making customers' content discoverable and available over any digital channel.

Let EBSCO help you keep your library running like a well-oiled machine for students, faculty and alumni.
