NEW! CUMHURIYET DIGITAL ARCHIVE

Established in May 1924, *Cumhuriyet* ("The Republic") is the oldest secular Turkish daily newspaper and is widely considered one of the last remaining opposition newspapers in Turkey. Over the last 95 years, *Cumhuriyet* has stood witness to the changing landscape of Turkey's political, social and economic environment. Despite the challenges of these times, the institution of *Cumhuriyet* has sustained its coverage of domestic and international news, providing critical documentation of Turkey's dynamic history and its relations with the global community. In the twenty-first century, *Cumhuriyet* continues to be one of the most influential newspapers in Turkey and is regarded by domestic and foreign readers as a reliable source for impartial, intelligent news reporting.

The *Cumhuriyet* Digital Archive currently includes over 260,000 pages from 1980-2019 and will ultimately contain all obtainable published issues from 1924 to 2019 (over 400,000 pages in total), with an additional year's worth of content added on an annual basis. INDEX TO HEBREW PERIODICALS

Produced by the University of Haifa Library in Israel, the Index to Hebrew Periodicals is a bibliographic indexing project covering articles from Hebrew periodicals, collections, and some monographs. IHP delivers content from 1977 in Hebrew, English, and other languages.

Offered on the Index to Hebrew Periodicals platform, the collection includes the following resources:

The Index to Hebrew Periodicals (IHP) – Abstracts of major Hebrew journals from 1977 to date with the exception of weeklies and newsletters. IHP covers a variety of subjects with an emphasis on Judaica, literature, education, arts, law, and current Israeli affairs (politics and society).

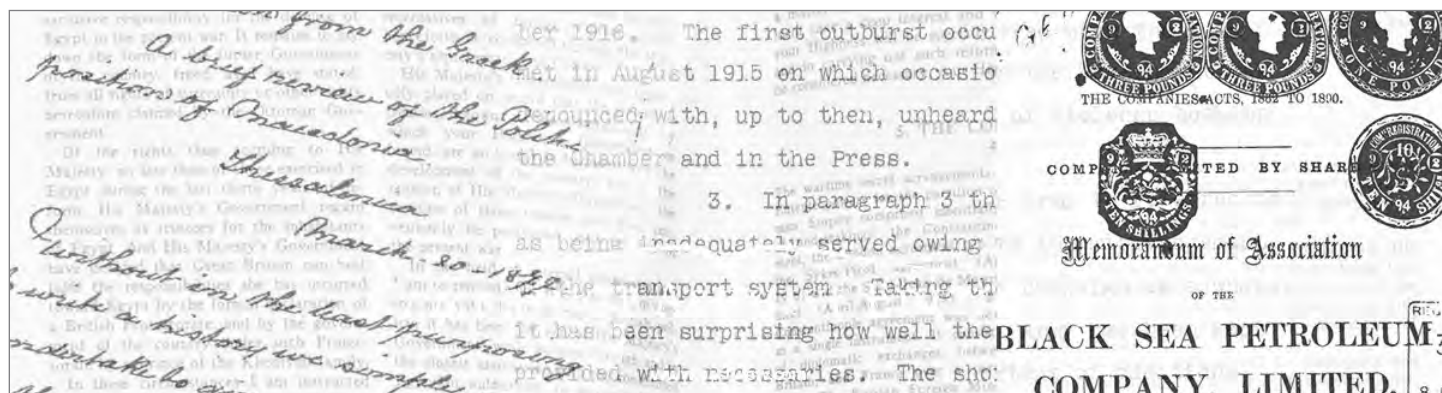

The Bar-Ilan Indexing Project – Carried out by the Indexing Unit of the Wurzwiler Central Library, it consists of two parallel projects: 1) an index to articles in the literary supplements of the daily Hebrew press (1985–). Includes the supplements of Ha'aretz, Yediot Aharonot, Ma'ariv, Ha'tsofeh, Yated Ne'eman, Ha'modia, Al-Hamishmar, Davar and Hadasht (the latter three – until they ceased publication); and 2) indexes to other Hebrew periodicals: Orlogin (1950–1957), Melila (1944–1956), Bar-Ilan (1965–1989) and Molad (1948–1986).

The Eretz Israel Database (EID) – A project of the University of Haifa Library in cooperation with the library of Yad Yitshak Ben Zvi, the purpose of EID is to complement the IHP with additional material relating to the history, geography, and archaeology of the land of Israel.

The Tel-Hai Index to Hebrew Newspapers (THIH) – A project of Tel-Hai College Library in Upper Galilee where indexing was produced and then input by the University of Haifa. Particular emphasis given to longer, analytical articles on social, economic, and political topics (including "op-ed" articles) as well as significant reviews of books, exhibitions, theater, and other cultural events.

The Index to Hebrew Periodicals Thesaurus – All four component files share the same common thesaurus of indexing terms. The Index to Hebrew Periodicals thesaurus is the largest and most comprehensive thesaurus of Hebrew indexing terms. The thesaurus is used by many other libraries and indexing projects in Israel and abroad. It contains about 230,000 subject entries. Subjects are interrelated using the standard broad/narrow/related term relationships, as well as scope notes and synonyms. The thesaurus terms are written in standard "brief" Hebrew orthographic form (ketiv haser).

CAMBRIDGE ARCHIVE EDITIONS ONLINE: NEAR & MIDDLE EAST COLLECTION

Today's researchers now have instant access to navigate and find the trusted source materials from the Cambridge Archive Editions collections. East View Information Services and Cambridge University Press have partnered to digitize the entire Cambridge Archive Editions collection.

Highlighting the national heritage and political development of many countries, the Cambridge Archive Editions collections are unique historical reference materials on political, territorial, and ethnic issues from the 18th-20th centuries. They are researched from files available in the public domain including, but not exclusively, the National Archives of the UK.

The CAE Near & Middle East Collection is an extensive library of resources on the modern political development of the Arabian Peninsula and the Persian Gulf. It reflects how Britain's relationships with various Middle Eastern countries were unique, whether by resolving conflicts, engaging in war, or establishing treaties. British diplomats were allowed exclusive access to leading government officials and were in a position to influence policy to be favorable to the British Empire. As a result, the collection may also shed light on the politics of today.

All of the nearly 1,000 print volumes and accompanying maps of the CAE Near & Middle East collection are available as online editions via the East View E-book Platform. Updated annually, the online editions mirror the print editions and feature document-level citations and rich indexing for a superior search experience.
