

# Ecology and evolutionary biology journal portfolio

THE  
ROYAL  
SOCIETY  
PUBLISHING

# BIOLOGY LETTERS

**Short, highly-innovative, cutting-edge research articles, reviews and opinion pieces.**

**Editor-in-Chief** David J Beerling FRS, University of Sheffield

- Publishes concise articles of 2500 words
- Provides authors with fast decision times
- Supported by a high profile, international Editorial Board

**Scope:** Across biology, including ecology, evolution, phylogenetics, and environmental science.

**Average receipt to first decision:** 25 days

**E** [biologyletters@royalsociety.org](mailto:biologyletters@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rsbl](http://royalsocietypublishing.org/journal/rsbl)

Operating open peer review

# OPEN BIOLOGY

**Open access journal publishing leading research in molecular and cellular biology.**

**Editor-in-Chief** Jon Pines FRS, Institute of Cancer Research

- Research, reviews, methods and techniques articles, and invited perspectives and commentaries
- Welcomes Open Question articles publicising emerging, underfunded areas of biomedical research
- Editorial Board comprising world-renowned scientists

**Scope:** Broad topics within cell and developmental biology, molecular and structural biology, biochemistry, neuroscience, immunology, microbiology and genetics.

**Average receipt to first decision:** 28 days

**E** [openbiology@royalsociety.org](mailto:openbiology@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rsob](http://royalsocietypublishing.org/journal/rsob)

## PROCEEDINGS B

The Royal Society's flagship research journal publishing outstanding research and high quality reviews.

**Editor-in-Chief** Spencer Barrett FRS, University of Toronto

- Research and reviews, evidence synthesis and biological science practices articles, invited perspectives, comments, replies and commentaries
- Regular Special Features on timely and important topics
- High profile international Editorial Board

**Scope:** All biology, including microbiology, parasitology, epidemiology, immunology and genetics.

**Average receipt to first decision:** 28 days

**E** [proceedingsb@royalsociety.org](mailto:proceedingsb@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rspb](http://royalsocietypublishing.org/journal/rspb)

Operating open peer review

## ROYAL SOCIETY OPEN SCIENCE

Open access journal publishing original research across all areas of science.

**Editor-in-Chief** Jeremy Sanders FRS, University of Cambridge

- Assessment on the basis of objective peer review
- Embodying open research principles (open access, open data, open peer review)
- No page limitations

**Scope:** All of science. Encourages cross-disciplinary research, replication studies and those that present negative results.

**E** [openscience@royalsociety.org](mailto:openscience@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rsos](http://royalsocietypublishing.org/journal/rsos)

You could be the next Guest Editor. Visit [bit.ly/PTBproposals](https://bit.ly/PTBproposals) for information on submitting a theme issue proposal.

# PHILOSOPHICAL TRANSACTIONS B

**Influential themed journal issues across the life sciences.**

**Editor-in-Chief** John Pickett FRS, Cardiff University

- Collections of cutting-edge and thought-provoking articles
- Issues are guest edited by leading authorities
- All articles are invited

**Scope:** Topics of current importance and general interest within the life sciences, often bridging traditional disciplines.

**E** [philtransb@royalsociety.org](mailto:philtransb@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rstb](https://royalsocietypublishing.org/journal/rstb)

# INTERFACE

**Cross-disciplinary research at the interface between the physical and life sciences.**

**Editor-in-Chief** Richard Cogdell FRS,  
University of Glasgow

- Research articles, reviews and reports
- High quality content and originality across disciplines
- Constructive peer review considers the physical and life sciences equally

**Scope:** Cross-disciplinary sciences, including systems biology, synthetic biology, chemical biology, and bionanotechnology.

**Average receipt to first decision:** 25 days

**E** [interface@royalsociety.org](mailto:interface@royalsociety.org)

**W** [royalsocietypublishing.org/journal/rsif](https://royalsocietypublishing.org/journal/rsif)

The Royal Society journal portfolio offers a range of publishing options within the areas of ecology and evolutionary biology.

**Reasons to choose the Royal Society for your work:**

- Articles handled by active, expert scientists
- Efficient and rapid processing
- Rigorous, constructive peer review
- Open access, open data, open peer review and Registered Reports available
- High production standards, with no charges for colour figures
- Preprint friendly: direct submission from bioRxiv now available
- Partnerships with Dryad, Figshare and Publons
- Wide international dissemination and extensive free access
- Articles promoted via the Royal Society Press Office
- 350 years of publishing experience
- Contribute to a charitable organisation that recognises, promotes, and supports excellence in science

Find out more and submit your research to a Royal Society journal

## The Royal Society

The Royal Society is a self-governing Fellowship of many of the world's most distinguished scientists drawn from all areas of science, engineering, and medicine. The Society's fundamental purpose, reflected in its founding Charters of the 1660s, is to recognise, promote, and support excellence in science and to encourage the development and use of science for the benefit of humanity.

### The Society's strategic priorities are:

- Promoting excellence in science
- Supporting international collaboration
- Demonstrating the importance of science to everyone

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science

Registered Charity No 207043  
Issued: November 2020 DES7193
