Message from the Editorial Board

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Aims and Scope

Land (ISSN 2073-445X) is an international and crossdisciplinary open access journal of land use/land change, land management, land system science, landscape, soil-sediment-water systems, urban contexts and urban-rural interactions, and land-climate interactions, etc. It publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible in order that results can be reproduced.

All aspects of land use and land cover change

Land systems science
Land-related issues in climate, ecology, the environmental sciences and the geosciences
Land management, including the application of ecosystem services approaches
Livelihoods, food security and supply chains in relation to land issues
Land tenure, including disputes and land grabs
Soil-sediment-water systems
Landscape planning, conservation and management
Landscape archaeology
Landscape design/Landscape architecture
Urban contexts and urban-rural interactions
Land-climate interactions
