

Pediatric-specific solutions designed
by pediatricians, for pediatricians.

FIT MATTERS.

See The OP Difference

At OP, we partner with our pediatric practices to help them improve clinical outcomes for their children and families, and financial outcomes for their business. Our EHR, PM system, and billing services were created by pediatricians for pediatricians. We're proud to offer the most comprehensive features, solutions, and services for pediatric practices and invite you to see the OP difference.

IMMUNIZATIONS

- Issues alerts for overdue vaccinations
- Provides patient-specific vaccine forecasting visible to the front desk and clinicians
- Alerts users if a vaccine is ordered, but not indicated in the immunization forecast
- Consists of up-to-date ACIP immunization forecasting and recall capabilities
- Streamlines inventory and administration of VFC & private lots with 2D barcode scanning

GROWTH CHARTS

- Includes AAP recommended WHO/CDC hybrid growth charts
- Provides Down Syndrome and premie growth curves
- Measures abnormal vitals based on Harriet Lane guidelines and AAP norms for blood pressure
- Prints growth charts and measurements on one page or delivers directly to the patient portal

COMPLEX/MODERN FAMILY STRUCTURE SUPPORT

- Defines financial, social and genetic families individually to support complex family structures
- Ability to transfer patient balances and credits among financial families
- Updates to contact information for one family member auto-populates for all family members
- Links family history to genetic parents for all siblings
- Allows for unlimited contact entries to support any family scenario
- Ability to set individual elements of a chart as private at several level
- Limits parent access to records on the portal that have been marked as confidential

TEMPLATES & CUSTOMIZATION

- Integrates AAP Bright Futures™ templates, surveys, education & developmental milestones
- Comes with over 200 preloaded and fully customizable pediatric-specific sick visit templates
- Completes school and camp forms from patient data with one click
- Includes over 30 pediatric-specific surveys including M-CHAT, Vanderbilt and CHADIS
- Automatically assigns the correct modifier and place of service for telemedicine visits

e-PRESCRIBING

- Automatically calculates weight-based dosing according to the patient's most recent weight
- Allows users to save favorites with weight-based dosing logic

BILLING

- Provides real-time eligibility through multiple integrated clearinghouse partners
- Codes vaccine administration charges automatically to payer-specific requirements
- Allows for the ability to run detailed patient and family credit reports
- Creates billing statements at a family or patient level

REPORTING

- Includes integrated well visit recalls based on the AAP Periodicity Schedule
- Customizes demographic recalls to meet your practice's specific needs
- Offers preloaded Pediatric Care Plans with item-specific recall capabilities
- Provides instant quality reporting metrics for Meaningful Use and PCMH

INTEGRATED PATIENT ENGAGEMENT TOOLS

- Facilitate automated text communications between families and your office, allowing patients to announce their arrival and pay their copay from the safety of their car
- Provide families with the option to self-schedule appointments directly through the patient portal
- Protect sensitive patient data from being displayed on the patient portal and set visibility level and restrict granular clinical information to balance patient safety/privacy
- Send appointment reminders, patient recall notices, and practice announcements based on a family's preferred method of contact
- Allow parents to upload photos to an integrated telemedicine platform, for practice staff to download, zoom in, and add to patient chart
