

INSS 2021

INTERDISCIPLINARY NUTRITION SCIENCES SYMPOSIUM

*HETEROGENEITY IN OBESITY: IMPLICATIONS FOR CANCER
AND RELATED OBESITY-ASSOCIATED OUTCOMES*
JUNE 21-22 2021 | VIRTUAL EVENT

INSS is an annual interdisciplinary translational nutrition science conference presented by the UNC Gillings School of Global Public Health Department of Nutrition.

INSS seeks to engage academic and industry leaders around this year's theme: **heterogeneity in obesity: implications for cancer and related obesity-associated outcomes**. Interactive presentations and discussion sessions will focus on four important cancer-related health issues: non-alcoholic fatty liver disease, unresolved chronic inflammation, the obesity-cancer link, and weight management. INSS's inclusive environment will provide opportunities for early career investigators from a wide range of backgrounds and disciplines to network with senior investigators.

With creative partnerships across academia, advocacy groups, and industry, INSS aims to foster ideas for proposals and collaborative projects, and ultimately, to **accelerate successful translational research**. **Keynote speakers include:**

Hans-Rudolf Berthoud, PhD, *George H. Bray Professor of Neuroscience and Head of the Neurobiology of Nutrition Laboratory, Pennington Biomedical Research Center, Louisiana State University*

Jennifer Ligibel, MD, *Director of the Leonard P. Zakim Center for Integrative Therapies, Dana-Farber Cancer Institute and Associate Professor of Medicine, Harvard Medical School*

Yaron Rotman, MD, MSc, *Investigator and Acting Section Chief, Liver Energy and Metabolism Section, Liver Diseases Branch, National Institute of Diabetes and Digestive and Kidney Diseases*

Charles Serhan, PhD, DSc, *Director of the Center for Experimental Therapeutics and Reperfusion Injury at Brigham and Women's Hospital; Simon Gelman Professor of Anesthesia, Harvard Medical School; and Professor of Oral Medicine, Infection and Immunity, Harvard School of Dental Medicine*
