

Azur[®]

Global Nutrition

Proven science. Healthier lives.

Specialized immune-nutrition for inflammation management

Who we are

We are specialists in the development and delivery of naturally sourced, science-backed **immune-nutrition solutions** to help address the increasing challenge of **inflammatory health conditions**.

Leaders in
immune-nutrition

Addresses inflammation
naturally

Unique IP-Protected
products

Robust clinical data to
support safe and effective
specialized nutrition solutions

Who we are – EXPERTS IN INFLAMMATION RESOLUTION

Pioneers in SPM science and technology, we're the leading supplier of IP-protected bioactive lipid formulations and 'specialized pro-resolving mediators' (SPMs) for nutritional, medical nutrition and skin health industries.

First to market SPM solutions for resolution of inflammation

Unrivalled expertise in resolution science

Capabilities to measure SPM bioactivity and SPM concentration in biological samples.

Product Portfolio

SPM Expertise

Our science-backed ‘specialized pro-resolving’ mediators including our unique, IP-protected LIPINOVA® solution help to address uncontrolled inflammation and support individuals with inflammatory health conditions.

Omega-3 Specialties

Our specialized omega-3 based formulations support individuals with metabolic related disorders or higher requirements of Omega-3s.

SPMs – Specialized Pro-Resolving Mediators

FOR INFLAMMATION RESOLUTION

LIPINOVA® is a unique, IP-protected ingredient concentrated in ‘specialized pro-resolving mediators’, or SPMs, to support the body’s natural capacity to resolve inflammation.

Unique SPM content

IP-protected ingredient containing standardized levels of SPMs: 18-HEPE, 17-HDHA & 14-HDHA

Specifically designed for pro-resolving activity

The only ingredient available concentrated in SPMs with characterized bioactivity.

Scientifically Proven

A non-toxic, data-based SPM solution demonstrated to be safe and effective.

Non-immunosuppressive

Resolves inflammation without compromising host defenses or suppressing the immune response.

Exclusive Delivery Forms

Oil available in different delivery forms including an IP protected nano-emulsion providing 1.5g in a single 15ml dose/sachet.

Fish Sourced

A unique combination of fractionation and purification techniques applied to fish oil through a proprietary and extensive enrichment process.

Environmentally Friendly Process

Sustainably sourced, gently processed and respects the product’s natural properties at all times during the enrichment process.

GRAS status

LIPINOVA is Generally Recognized as Safe by the FDA.

SPMs – Specialized Pro-Resolving Mediators

TAKE IMMUNE NUTRITION FURTHER

Elevate your SPM solutions with our advanced **HDAS** technology, the only tool in the market that accurately measures SPMs in biological samples to guarantee the highest quality and most effective concentrations for inflammation resolution.

HDAS includes the necessary equipment to measure biomarkers of the immune response and its evolution to identify the resolutive or immunosuppressed status of an individual, as well as the severity and progression of disease.

We help our partners in developing clinical trials and pre-clinical studies that will help them **generate exclusive data** on specific health conditions, enabling **competitive advantage** in the immune-nutrition market.

GOLDaid®

FOR HIGHER EPA REQUIREMENTS

GOLDaid® is a convenient IP-protected liquid emulsion that provides a more readily bioavailable formulation of EPA to individuals with **compromised lipid metabolism or increased EPA requirements.**

High Dose EPA

GOLDaid® is the only product offering 3g EPA in a single 20 ml dose

100% Natural

Developed using natural omega-3 fatty acids, available in three flavors

IP-Protected

Our Emugel™ emulsion technology is IP-protected

Convenient

GOLDaid® is a unique, liquid emulsion available in a single, easy-to-swallow serving

MAGaid™

FOR LIPID MALABSORPTION

MAGaid™ provides a monoglyceride-rich DHA oil derived from *Schizochytrium* sp algae. The monoglyceride chemical form (MAG) of fatty acids enhance absorption and oral bioavailability of DHA omega-3. This effective and promising delivery method helps consumers with **inhibited lipid absorption** acquire the health benefits of DHA supplementation.

IP-Protected

MAGaid™ is IP-protected

53% MAG-DHA

Improves bioavailability by delivering a high concentration of absorption-ready MAG-DHA

Plant-Based Solution

MAG-DHA is derived from *Schizochytrium* sp algae

GRAS Status

Schizochytrium sp algae is Generally Recognized as Safe

Conclusions

Uncontrolled inflammation plays a key role in many chronic diseases, metabolic related disorders and skin conditions.

Our natural immune-nutrition solutions help address inflammation and improve quality of life.

- **Differentiation:** unique and IP protected solutions
- **Pioneers:** unrivalled expertise in resolution science
- **Natural:** resolution of inflammation
- **Efficacy:** science-backed immune-nutrition solutions
- **HDAS support:** capability to measure SPM levels
