

BIOENERGY LIFE SCIENCE, INC.

Ingredients for Healthier Living™

## Built on Innovation

Our company's foundation is based on research by pediatric cardiothoracic surgeon, John E. Foker, MD, Ph.D. Dr. Foker realized that an invasive cardiac procedure for a congenital defect often led to additional issues in his young patients. In an effort to improve outcomes for these children, he conducted substantial pre-clinical research and discovered that D-Ribose given orally and intravenously helped alleviate the potential for further damage from the cardiac procedure. He was granted a patent in 1988 for this life-changing discovery.

Research at the University of Minnesota led to additional patents and the formation (1986) and subsequent incorporation (1990) of Bioenergy, Inc. With this, we quickly became known as The Ribose Company.

Dr. Foker uncovered the temporal relationship between the amount of energy as it relates to the heart and its diastolic functions, such as the ability to relax before contraction. Bioenergy Ribose drives the synthesis and replenishment of critical energy compounds (i.e. ATP). This supports cardiovascular health and overall vitality.

**We continue to build on this innovation to develop other powerful, clinically proven ingredients.**

# Innovative ingredients for healthier living

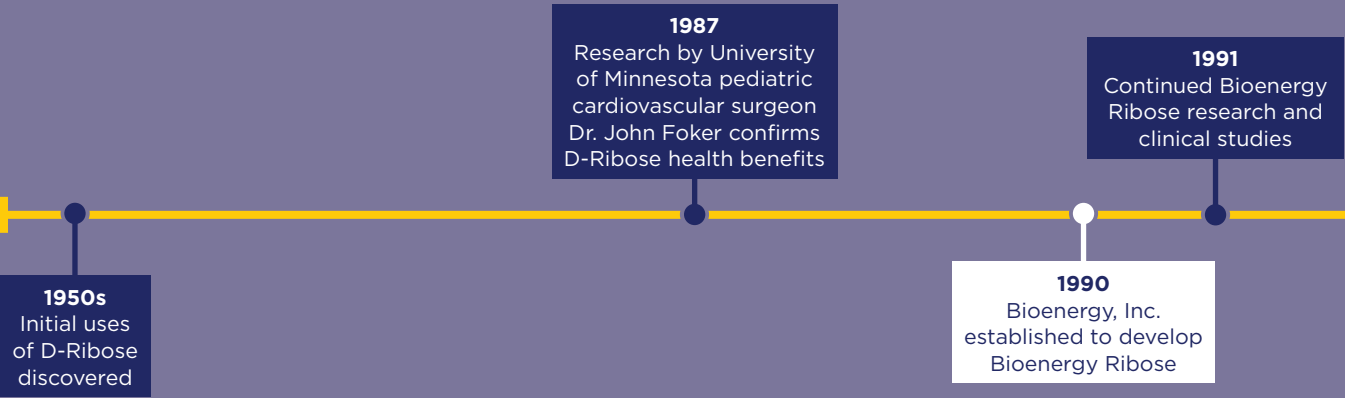

Bioenergy Life Science (BLS) develops new scientifically based, all-natural and pure ingredients that help people of all ages feel, perform and look better from the inside out.

We use proprietary core technology and more than 30 years of experience to develop clinically proven health-enhancing ingredients, including Bioenergy Ribose®, the only patented and FDA GRAS-certified multi-functional D-Ribose on the market.

## Bioenergy Life Science products support:

- |                      |  |
|----------------------|--|
| Mitochondrial health | Heart health                             |
| Healthy aging        | Weight management                        |
| Performance          | And many other health-promoting benefits |

BLS-branded ingredients are added to a variety of product formulations to add functionality and enhanced benefits.

**Better energy. Better performance.**

Bioenergy Ribose is a powerful, clinically proven functional ingredient that delivers unique health benefits by increasing energy at the cellular level. Sought after by both professional athletes and weekend warriors, this versatile and all-natural ingredient can be used in functional foods & beverages, dietary supplements, cosmetics or as a stand-alone product.

Increase athletic performance and endurance

Restore and sustain energy

Accelerate recovery

Reduce muscle stiffness and soreness

Support cardiovascular health

Help maintain healthy blood flow and circulation

**Natural**

**Non-GMO**

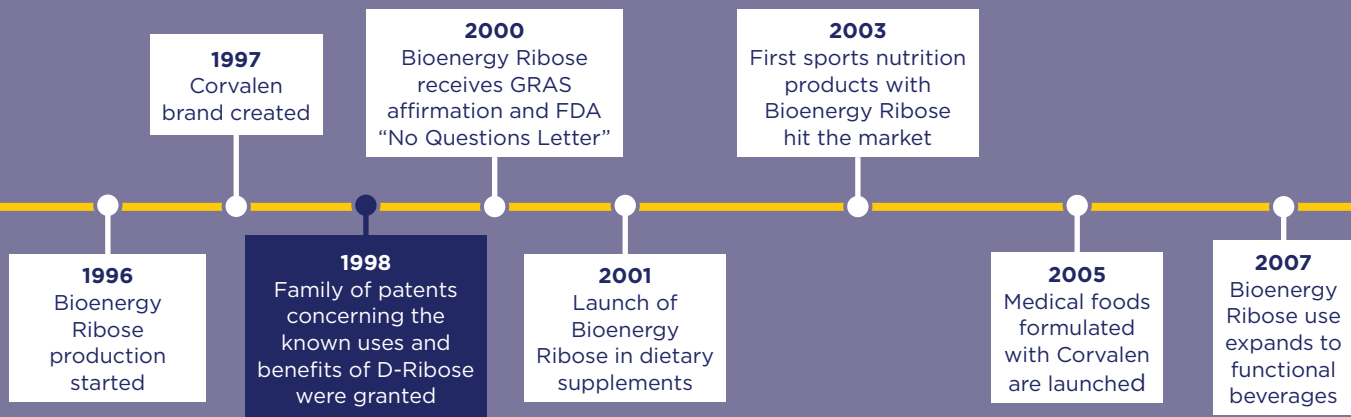

**Patented**

**Highly soluble**

**Slightly sweet**

RiaGeV combines the power of Bioenergy Ribose with a form of Vitamin B3 to deliver unique cellular benefits which promote healthy aging. This all-natural and innovative ingredient helps slow the aging process from the inside out by efficiently increasing the cellular nicotinamide adenine dinucleotide (NAD) levels. It's more efficient than other NAD boosters because it enters the pathway directly.

RiaGeV can be used as a stand-alone product or in functional foods & beverages, dietary supplements and cosmetic applications.

Support mitochondrial health

Help maintain age-related cognitive health

Increase ATP and NAD to slow aging

Revitalize and smooth wrinkled skin

**Natural**

**Non-GMO**

**Clinically proven**

**Patented**

**2007**  
Additional patents granted for use of Bioenergy Ribose

**2008**  
Team Ribose formed

**2010**  
Additional patents granted for use of Bioenergy Ribose

**2012**  
First functional food with Bioenergy Ribose launched

**2013**  
Bioenergy Ribose use expands to cosmetics market

**2014**  
Bioenergy Ribose use expands to animal nutrition market

**2016**  
Additional patents granted for use of Bioenergy Ribose

**2018**  
Launch of RiaGeV, backed by clinical studies and patent
