

One device for multiple applications

Control rate freezing

How does your application
look like?

Pick/sort sample at 4-8°C

Realize full automated and
traceable workflows

Reduce workload for
users/operators

Pick/sort frozen samples
at -130°C

Monitor processes remotely

Temporary store frozen samples
at -150°C

Ensure 24/7 operation

Compress partial filled SBS
Rack to maximize your storage
efficiency

Implement automated picking to
your e.g. -80°C or LN facility

Sort/separate aliquots from one
SBS Rack into multiple ones in
automated way
