Copy Stands for every type of application

For reproduction with a camera, the **Copy Stand** is an **essential tool**. The right copy stand achieves quality repeatable results.

For assistance selecting the right copy stand, or questions, contact the experts at B3K Digital

Copy Stand Considerations

Size and weight of camera, object size and space required must be balanced with current projects, future projects and budget. The following considerations can make selecting a copy stand easier.

Levelling

- Baseboard levelling - included with all solutions
- Column levelling - product specific
- Camera head levelling - product specific

Camera mounting, position, orientations

- Is portrait and landscape orientations required
- How far does the camera need to move from column
- Does the camera change height often
- Is height adjustment course or critical

Sharpness - Vibration reduction

- Is copy stand appropriate for camera weight
- Is the Column head large enough for the camera

Object requirements

- Is copy board size enough for object size
- Will lighting cover object size
- Is column length tall enough for selected optics

Ergonomics

- Is a table required to hold the copy stand

EXCEPTIONAL EQUIPMENT

Kaiser Copylizer exe.cutive LED - The universal capture tool

Reflective and Transmissive LED light source copy stand

Copylizer all-in-one all-LED solution - Kit KA-201K - Column and Illumina LED base, RB 520 AS LED lighting with arms, KA-5215 and KA-5279

For constantly changing reflective and transmissive objects in various sizes. Ideal for general office use.

- Create a single point for copy work
- Bright, dimmable reflective and transmissive LED light sources , no UV or IR
- Transmissive up to 19.9 x 14.2 in / 50.6 x 36 cm
- Cameras and lenses up to 4 Kg / 8.8 lbs
- Ideal column length for standard and macro optics based on coverage areas

Copylizer Column:

Specialized Aluminum, high stability, vibration resistant, cm and inch scales

Column dimensions:

70mm / 2.8 in width

100 cm / 39.4 in. height

Column height adjustment

Hand Crank, counterweighted

Copylizer Camera arm:

Detachable, interchangeable, horizontal mount, 1/4" and 3/8" interchangeable

KA-5215

Copylizer exe.cutive LED with Illumina base.

Illumina Base

Size: 63 x 55 cm / 24.8 x 21.7 in.

Serviceable Illuminated area

19.9 x 14.2 in / 50.6 x 36 cm

Light source: 270 SMD LEDs,

Colour Temp: Approx. 5600 K

Output quality: CRI=95

Luminosity: 8300 cd/m²

Features: Dimmable, flicker free, base with spirit level

KA-5279

Kaiser RB 520 AS LED Copylizer lighting unit

Illuminated area:

41.5 x 16.5 cm / 16.3 x 6.5 in. per lamp, flicker free

Light source: 2 x 192 SMD

Colour Temp: Approx. 5600 K

Output Quality: CRI=95

Luminosity: 5600 lux without diffusor, 5000 lux with diffusor

Arms / clamps: Steel tube with square cross section, tilt / angle adjustable

KA-5292 Crystal glass pressure plate

Includes adjustable stop guides. Fits hinge on Illumina base

KA-5294 Metal Plate

Includes 4 magnetic holders and adjustable stop guides. Fits hinge on Illumina base, printed grid for positioning

Kaiser R1 - Universal Mount System - Multi-purpose solutions

One investment for copy work, film scanning, colour or B&W analog printing

Column accepts camera mounts and both Colour and B+W enlarger heads

Aluminum cast column mount fits enlarger base boards, copy stand base boards and specialty bases like the Copylizer light table base.

Copy Stand camera arms and the enlarger head body module use a common mount fitting the R1 Column

Copy work, film Scanning, B&W Analog printing

Copylizer all-in-one all-LED solution - Kit
KA-201K - Column and Illumina LED base, RB 520 AS LED lighting with arms, **KA-5215** and **KA-5279, KA-5292** Glass pressure plate

Contact us for full complete solution details

B&W printing add:

KA-454101 B&W Head SYSTEM-V, up to 6 x 9 cm

KA-4568 Enlarger head, connects to column

For Film scanning add:

KA-2457 FilmCopy Vario with holder, film insert 24 x 36 mm, mounted sliced, overlay mat, (no Slimlite Plano Light table required)

KA-4449 Enlarger head, connects to column

Colour Analog printing, copy work, film Scanning

KA-4550 Colour Enlarger
KA-445301 power supply
 Color enlarger for up to 6 x 9 cm (2.4 x 3.5 in.) film and lenses up to 105 mm. Suitable for printing on variable gradation papers (e.g. Multigrade ®) and graded black-and-white papers.

Contact us for full complete solution details

For Copy work add:

KA-5550 LED lighting with arms

KA-5520 RA1 Camera head

For Film scanning add:

KA-2458 FilmCopy Vario with holder, film insert 24 x 36 mm, mounted sliced, overlay mat, and Slimlite Plano Light table

B&W Analog printing, copy work, film Scanning

KA-454001 Enlarger
 VP 9005 B&W Condenser enlarger SYSTEM-V for formats up to 6x9 cm. Precision Microdrive Column

Kaiser R1 Copy Stand System

R1 Columns

R1 Base boards

Camera Heads

Table base

Wall Mount

Copy Stand bundles

Multi-functional modular copy stands

R1 Series copy stands are professional use, well engineered solutions with quality German workmanship. For Camera systems up to 4.0 Kg / 8.8 lbs.

Columns

Matt black anodized aluminum columns in various lengths. Versions include friction, rack and pinion as well as counter balanced camera position systems. Micro drive version available for ultra fine camera positioning. Fine levelling adjustments available on camera arm holder system.

Base Boards

Matt grey finish with fine grid, cm / inch scale, individually height adjustable feet for levelling,

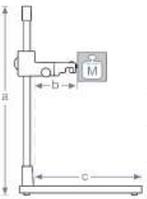

Camera heads

The head system consists of 8 components allowing camera mounting with differing amounts of adjustment and positioning control.

Table frames and accessories

For ergonomic operation, a table base is available that allows the copy stand to become free standing. This can save space as well as add to versatility. Additional accessories includes a wall mount, roll-up tables and an extraneous Light Protector for work spaces that are out in the open.

Kaiser R1 Copy Stand System

A-la-carte

A-la-carte

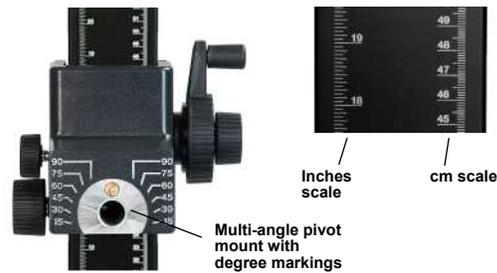

Although pre-bundled products are offered, the R1 Copy Stand System has so many options that bundles for every application are not practical. The A-la-carte section defines options available as well as functions creating the best possible combination for the job. Options covers wide ranging applications from Industrial machine vision to more traditional cameras or even Smartphones with the **KA-6015** Smartphone holder. Specialty products like the **KA-5504** Metal Base Plate is ideal for industrial, manufacturing, medical and research applications. Options include the **KA-4412** wall mount or the **KA-5508** Table Fame, which creates an independent station.

Camera mounts - Specifications

The camera mount simplifies camera attachment to the copy stand and positioning of the camera. The camera can be mounted facing the column or facing out from the column depending on mount. Inward or outward mounting can be critical for accessing key camera functions. All camera mounts include both 3/8" / 1/4" thread camera screws.

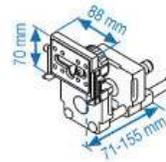

RTX - KA-5522

- Horizontally adjustable via parallel guides with fine drive
- Camera mounting plate turns +- 90°
- Spirit level
- Camera mounts on front and rear

RT 1 - KA-5521

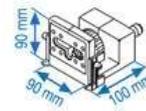

- Horizontally adjustable via parallel guides
- Two mounting positions for horizontal and vertical format
- Arm tilt-able

RTP - KA-5524

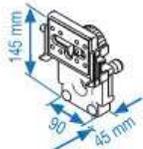

- Horizontally adjustable via parallel guides
- Camera positioning device

Made in Germany

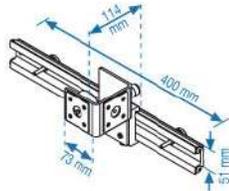

RA 1 - KA-5520

- Camera positioning device
- Simplest mount

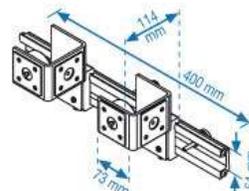

RA 101 - KA-5523

- For camera with greater distance between tripod mount and optical axis
- Camera positioning device

RLR - KA-5539

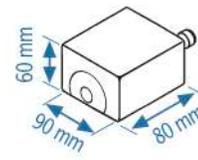

- Camera platform can be shifted horizontally to left or right
- Adjustable stops for end position
- Camera mounts for landscape or portrait orientation

2CC - KA-5540

- Two camera platforms can be shifted horizontally left or right
- For carrying two cameras simultaneously

Made in Germany

Extension Arm KA- 4455

- Extends the holding arm of the column by 8 cm /3.1 in.

Lighting - LED

The Kaiser LED light systems are DC (direct current) offering flicker free operation. Emitted light has no UV (ultra violet) or IR (Infra red) content meeting the most stringent requirements for light sensitive objects. The efficiency of LED lighting is especially important for the environment by using less electricity and by producing a lot less heat compared to other continuous light sources.

KA-5551 RB 550 AL LED

Includes removable diffusers. Each light can be dimmed individually or together from 10% to 100% in 1% increments. Solid aluminum main housing

Ideal for

All R1 Systems, RSD and RSD Mot copy systems

Illuminated area:

41.5 x 16.5 cm / 16.3 x 6.5 in. per light

Angle of Coverage: 110°

LED Array: 2 x 192 SMD - LED's

Colour Temp: Approx. 5600 K

Output Quality: CRI=95, flicker free

Luminosity: 5600 lux without diffuser

5000 lux with diffuser

Power Consumption: 2 x 38.4 Watts

Arms / clamps: Steel tube with square cross section, tilt, angle, height adjustable

KA-5550 RB 5070 DX2 LED

Includes removable diffusers. Each light can be dimmed individually or together.

Ideal for

All R1 systems

Illuminated area:

33 x 8.5 cm / 13x 3.3 in. per light

Angle of Coverage: 110°

LED Array: 2x 161 SMD LED's

Colour Temp: Approx. 5600 K

Output Quality: CRI=95, flicker free

Luminosity: 3000 lux

Power Consumption: 2 x 27 Watts

Arms / clamps: Steel tube with square cross section, tilt, angle, height adjustable
