# TRANSFORM SELF-CHECK SERVICES

You can transform the circulation experience you offer patrons, by providing a self-check kiosk specifically designed to expedite material check-out and check-in. With a slim, unobtrusive and elegant appearance, it is designed to easily integrate into your décor. Built for today's needs, it can read traditional library cards, key fob barcodes and smartphone barcodes.

Lyra Self-Check Kiosk

The Lyra Self Check kiosk uses a state-of-the-art, cloud-based software, built on the latest technologies. This kiosk allows patrons to check-out and check-in, while also being able to renew items without having the items in hand (from a selectable list). It is designed for barcode and RFID sites.   The Lyra Self-Check Kiosk is fully compatible with all common library systems, using a standard SIP2 interface to connect with your ILS.

 Lyra's design emphasizes usability and ergonomics for patrons, as well as maintainability and ease of service for library staff. With special attention being paid to appearance; the design is light, slim, and stylish. All hardware is integrated into the furniture, including the large 19" touchscreen (with the standalone kiosk, or 17" with the tabletop model), printer and RFID Antenna (optional). The barcode reader is mounted on a fully positional bracket that covers the whole reading area.

It comes in both standalone kiosk and a tabletop model. The standalone model can be produced in any RAL colour allowing you to customize their look to match your branding. The desktop model occupies a footprint of only 500 x 400 mm. A silent fan-less PC unit and power supply all converge in a single easily accessed plane. The sleek acrylic surround completes the contemporary aesthetic.

The software is multilingual, supporting several languages, of which four can be active at any onetime. All onscreen text can be customized, as well as receipts.   And all text on screen and on receipts, can be modified by the library with easy-to-use tools. In addition, the interface allows for branding, allowing the library to display graphics to promote library and community events and programs.
