

DIAMOND SOCK[®]

Pre-filled Compost Filter Sock

When you order blue sock our team is on it – manufacturing, logistics, and customer service.

Because quality matters – a lot. We religiously test our fill material for compliance to both brand and industry specifications. Our pre-filled netting is custom made to our brand specifications and exceeds regulatory standards – it's not "off the shelf" netting.

We have our own trucks and drivers (we know 3rd party trucking can be complicated) so we can keep our delivery promises.

We regularly go on-site to assist contractors with inspections. If questions come up, we come out.

Since 2011 we have shipped over 200,000 units of pre-filled material to customers in 22 states.

General Details:

- 8, 12, 18, and 24-inch diameters, continuous or pre-cuts
- Weather resistant packaging – wrapped pallet or in super sack
- Available with bagged edging mulch (specify when ordering)
- 26 pallets per flatbed tractor (smaller orders available)
- Hardwood stakes included on all continuous pallets

Netting Details:

- HDMFPP, 1/8-inch opening, +202 psi strength
- Blue and Black pattern (super strength Hi-Vis available)

Fill Details:

- Composted rough-cut Hardwood Mulch
- Regularly compliance tested at Penn State Agronomics Lab
- Switchgrass fill available (see SwitchSock[®])
