

#### Who we are

We are radiologists who are sub-specialized in MRI. Whether creating beautifully clear images with our own 3T MRIs, or consulting on your cases, our true passion is finding answers and improving outcomes for patients.

#### What we do

At our advanced outpatient imaging centers in Utah and Texas, we provide 3T MRI, 128 slice CT, and more, while also serving as ACVR accredited teaching institutions. Our teleradiology practice offers a complete range of specialized MRI experience to effectively collaborate with neurologists and surgeons on the most challenging cases.

## Why we do it

We believe in advancing the state of veterinary diagnostic imaging through next-level technology, collaboration, protocol standardization, and teaching.

### Work with us

Collaborate with us on your cases and uncover the diagnostic nuances that lead to exceptional patient outcomes.

Join our team! We are growing quickly and placing skilled neurologists in our imaging centers.
