## Why MRI Vets Online?

- **On your schedule:** Our courses are on-demand, self-paced, and interactive with one-on-one coaching at the end of each week.
- **Value:** Gain diagnostic confidence in MRI
- **Experience:** We draw on materials developed over decades of teaching by Dr. Pat Gavin in his original fellowship courses, his presentations to academic groups, and our own file of thousands of high-quality images, including findings confirmed by histopathology.
- **Rigorous:** Each course is 5 weeks long, and contains 25 or more representative cases, including practice writing reports, and a gold-standard report with key images for every case.

## Jaime Sage, DMV, MS, DACVR Chief Radiologist

Born and raised in Round Rock, Texas, Dr. Sage received her veterinary training at Texas A&M and completed her radiology residency at Ohio State. She began her career at VDIC Portland (now IDEXX telemedicine), where she developed a strong interest in clinical MRI. In 2014, Dr Sage began a mentor-partnership with Dr. Pat Gavin, and completed the purchase of MRI Vets in 2018. In 2021, she became president of the CT/MRI society of the American College of Veterinary Radiology.
