

## Feeding and Administration:

## Gastrointestinal Health and Food Sensitivities:

Formulated with purified amino acids to support dermatological and gastrointestinal health in dogs with adverse food reactions

Low-allergen carbohydrate sources to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Limited fat to aid digestion for dogs with compromised gastrointestinal tracts
- Contains medium-chain triglycerides (10.70 - 17.27% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Post-manufacturing testing conducted to ensure trace levels of intact proteins do not exceed 0.1%

## General Health:

- Contains omega-3 fatty acids, a source of EPA and DHA, omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Contains prebiotic fiber to help nourish the GI tract
- Great taste to ensure adequate nutrition intake

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
